**ADVENTOS INTRODUCES SMARTFORCE™**

**GREENWOOD VILLAGE, COLO.** – November 29<sup>th</sup>, 2012 – Adventos has introduced SmartForce™, a solution designed to help law enforcement agencies reduce risk and maximize department efficiency. SmartForce targets common problems within law enforcement departments such as budget constraints and timely information sharing through the generation of secure and accessible data that provides the team with the insights necessary to make prompt, informed decisions. The solution drives efficiency gains by centralizing the management of workflows and processes with a technology that is easy to use and affordable.

SmartForce is rapidly deployable and can easily be expanded and tailored to fit any department's specific needs. Solutions can include records management, automated forms/reports, workflow automation, real-time leadership dashboards, centralized data access, unified communication capabilities, risk management, and cost reduction.

Available now, SmartForce is executed in a "done-for-you" custom program through a secure Cloud. In four weeks, SmartForce is customized and deployed, including implementation and training. Adventos Assurance training programs are designed to increase organization-wide adoption rates and ensure that the technology is utilized to its full effectiveness.

**About Adventos LLC**

Adventos LLC is a technology consulting firm that helps public sector organizations successfully navigate technology implementations and leverage the power of the investment through comprehensive IT counsel and training. Adventos enables organizations to become self-sufficient and achieve maximum efficiency and higher levels of productivity. Adventos is the Microsoft 2012 U.S. State and Local Government Solutions Partner of the Year.
