Facility Results Expands Its Electrical Safety Training Team to Include Author, Trainer Charles Miller

Plymouth, Michigan. November 27, 2012—Facility Results continues to strengthen its niche in NFPA 70E and electrical safety training through the recent addition of Charles R. Miller—master electrician, trainer, and author—to the team. Miller rounds out the experienced six-member Facility Results training team, which is already known for its depth, knowledge, and ability to successfully convey the value and real-life benefits of implementing electrical safety best practices.

“He is a perfect fit for the Facility Results training team. When businesses contract with us for training, they count on our trainers, like Charles, who are tops in the field when it comes to real-world application of electrical safety and reliability standards and regulations,” explains Bryan Rupert, co-founder and lead consultant at Facility Results.

Based out of Lebanon, TN, Charles spent twenty years as a successful business owner and electrical contractor. Since then, he has focused his time and energy on writing and teaching to promote knowledge and proficiency among engineers, electricians, and tradespeople in the field. Throughout his career, Charles has passed more than 40 Master Electrical Exams (with a score of 93 or higher) and 7 Electrical Inspector Exams. As an author and illustrator, he has an extensive list of electrical-safety-related publications to his credit, including some published by the National Fire Protection Association (NFPA). Miller also sits on two NFPA committees, including the committee for the NFPA 70E standard.

“Even as an electrician and contractor working in commercial and industrial environments, I’ve always been a very visual person,” says Miller. “Codes and standards can be very difficult and very dry. As an instructor I try to convey the information in a way that enables my students to visualize more so they’ll retain the information and actually put it to good use.”

Charles Miller—master electrician, trainer, and author, has joined the training team at Facility Results

As a member of the Facility Results training team, Miller will be traveling around the country instructing electricians, contractors, and facilities personnel across a wide range of industries on tried and true methods for reducing their exposure to electrical safety hazards such as arc flash. For information on the extensive list of training classes offered by Facility Results and more detail on the Facility Results trainers, including Charles Miller, visit www.facilityresults.com and click on the Training tab.

Founded in 2009 by Bryan and Kelly Rupert, Facility Results of Plymouth, Michigan, offers an extensive collection of electrical reliability and safety solutions in the form of products, services, and training. In addition to FlashTrack™, their flagship software for performing arc flash analyses, the company offers NFPA 70E table-based label solutions, an engineer-assisted arc flash compliance program, a turnkey-engineered arc flash program, electrical system maintenance services, comprehensive NFPA 70E training programs, and workplace safety placarding and poster downloads with an emphasis on Personal Protective Equipment (PPE). Facility Results has conducted over 100 training sessions across the United States on the NFPA 70E Standard as well as OSHA training, including Lockout/Tagout, Confined Space Assessment, Asbestos Standards, and more. For information on Facility Results and/or its products and services, contact the company at 888.762.0090 or email info@FacilityResults.com.
