

New York State Amateur Hockey Association Chooses Commercial Investigations LLC as the Official Background Investigator for its Volunteers

COHOES, New York, November, 2012 -- Commercial Investigations LLC (CI), a pioneer in volunteer background screening, has been selected by the New York State Amateur Hockey Association as the provider of online background investigations for its volunteers.

The New York State Amateur Hockey Association has chosen Commercial Investigations as their preferred provider for background screening of volunteers, coaches, and officials because of Volunteer Screening Solutions and Cursory Indicator New York, two of its innovative new services launching this year.

Joe Baudo, President of the New York State Amateur Hockey Association said *“the information we are getting from the system is terrific. It has flagged those volunteers who don't meet our criteria for working with minors. It is helping us protect our youth and providing a safer environment for our sport. The entire CI staff is very responsive and helpful. It's a pleasure working with them.”*

Volunteer Screening Solutions, or ‘VSS’ allows volunteers to easily enter and view their background investigations in an online environment. This service protects the volunteer by masking sensitive data and ensuring compliance with the Fair Credit Reporting Act. Cursory Indicator New York was launched quietly in 2011 after being in development since 1999. Cursory Indicator New York is proprietary to Commercial Investigations; allowing CI unique access to data which reveals misdemeanor and felony criminal information in New York without requiring an expensive search on all individuals.

Michelle Pyan, President of Commercial Investigations, said “we're really excited to provide the in-depth information that they're longing for with Cursory Indicator New York, and having our VSS technology made it easy to offer them the truly complete solution they were looking for.”
