Oxygen Forensic Suite
Smart Forensics for Smart Phones

PC software designed to extract the maximum information from smartphones, cell phones and other mobile devices for forensic purposes.

Brief information:

- **Focus on smartphones.** Nowadays, the cell phone market has turned to smartphones. Oxygen Forensic Suite uses an innovative approach to extract more information from Android, Apple iOS, Blackberry, Symbian OS, Windows Mobile and other smartphones compared to competing tools.

- **Pioneer in geo-location data extraction**. Oxygen Forensic Suite was the first tool capable of extracting geo information from smartphones. Today, it remains a leader in this area.

- **First tool Android physical analysis.** The Android Rooting add-on for Oxygen Forensic Suite allows recovering the complete file system along with deleted data and full physical memory dump.

- **Extensive support for Chinese mobile phones.** The low end of the market is switching to inexpensive Chinese devices. We are constantly watching the market, adding support for a wide range of popular Chinese mobile phones.

- **More than 6500 device models supported.** We care about the quality, not quantity. There are tools touting a higher number, but you'll never find another tool offering comparable extraction, analysis, searching and reporting capabilities.

- **User data extraction from pre-installed and third-party smartphone applications.** A mobile phone is more than just a phone. Skype, Facebook, Twitter, Google services, Foursquare and other applications keep their own databases in a smartphone. Oxygen Forensic Suite extracts and parses this information, presenting the data in a convenient and well-organized way.

- **The Timeline section combines extracted events that having a timestamp into a single list.** Review all user activities at a glance in a single view. No need to switch between multiple windows to examine all of the suspect's activities during a specified time period.

- **Compatible with most popular mobile formats.** Oxygen Forensic Suite can load and parse data from Blackberry IPD, Blackberry BBB, Apple iTunes, Apple DMG, Nokia PM, SQLite databases, as well as Plist files.

- **Convenient analysis, exporting and reporting.** Oxygen Forensic Suite is designed specifically for forensic analysis, searching for evidence and reporting. The tool can either print reports or export them to one of the many popular file formats.

- **Deleted data extraction.** Oxygen Forensic Suite can recover deleted information from smartphones running popular systems such as Apple iOS, Android, Symbian etc.

Feature	Standard	Analyst
Support for 6500+ mobile devices	Yes	Yes
Strong support for Android, Apple iOS, Blackberry, Symbian OS, Windows Mobile, Bada and other smartphones	Yes	Yes
Cable/Bluetooth/IR connection	Yes	Yes
Phone Connection Wizard and Data Extraction Wizard running in background	Yes	Yes
Exports data to most popular formats	Yes	Yes
General data extraction (contacts, speed dials, caller groups, calendar, SMS, E-mail, calls, tasks, notes, Wi-Fi and 3G activity)	Yes	Yes
Geo event positioning – EXIF/XMP headers, Nokia LifeBlog	-	Yes
Web cache and bookmarks analyzer (various browsers supported)	-	Yes
Dictionaries	-	Yes
Web Connections and Location Services	-	Yes
Timeline & Geo Timeline for all phone events	-	Yes
Aggregated Contacts	-	Yes
Key Evidence	-	Yes
Passwords	-	Yes
Applications	-	Yes
Google Services (Google+, Maps, Mail, Talk, Calendar etc)	-	Yes
Yahoo Services (Yahoo Mail, Yahoo Messenger)	-	Yes
Social Networks (Instagram, Facebook, Twitter, Foursquare, Twinkle, VK, Odnoklassniki)	-	Yes
Messengers (Skype, Touch, WhatsApp, Kik, Textie, Facebook, HeyTell)	-	Yes
Productivity (Dropbox, Evernote, Remember The Milk)	-	Yes
Advanced search in multiple devices	-	Yes
Communications statistics for several devices – table and diagram	-	Yes
Physical analysis with Android Rooting add-on	-	Yes
Chinese Phones Support add-on	Yes	Yes
Apple DMG physical image parser	-	Yes
Apple iTunes backup reader (including password-protected backups)	-	Yes
Apple Plist Viewer	-	Yes
SQLite databases Viewer with deleted data recovery options	-	Yes
Blackberry IPD backup Viewer (including password-protected backups)	-	Yes
Blackberry BBB backup reader (including password-protected backups)	-	Yes
Nokia PM Viewer	-	Yes
