## **Entrada Publishes White Paper on ExpressFax, a Productivity Tool that Automates Faxing Within the NextGen EHR System**

**A DISCUSSION OF HOW ENTRADA'S EXPRESSFAX TECHNOLOGY REDUCES ERRORS, IMPROVES EFFICIENCY AND ACCELERATES DOCUMENT DELIVERY BY SIMPLIFYING NEXTGEN'S NATIVE FAX PROCESS**

NASHVILLE, Tenn., December 11, 2012 - Today [Entrada](#) announced the publication and release of its latest [white paper](#), discussing the functionality and benefits of ExpressFax, Entrada's simple, yet powerful solution for quickly and easily automating and sending faxes directly within the NextGen EHR system. As the latest addition to its product technology suite, the white paper highlights the productivity enhancements achievable with ExpressFax.

Entrada's ExpressFax technology expands upon the faxing capabilities of the NextGen electronic health record system, simplifying the process by providing customization tools and powerful automation. With ExpressFax, any generated document that includes a "CC" is delivered automatically without staff intervention, increasing staff productivity and efficiency by reducing the manual nature of NextGen's native faxing process. ExpressFax also reduces costs by reducing the amount of dedicated staff resources necessary for faxing, as Entrada has calculated that it requires approximately one full-time staff member focused exclusively on delivering faxes to meet the fax workload of eight to ten physicians.

[ExpressFax](#) was specifically built for NextGen customers who utilize the native faxing option within their daily workflows but who are experiencing faxing challenges such as a productivity drain on staff or slow document turnaround time. With ExpressFax, providers can create their own unique rules to automate even their most complex faxing workflows. Also, with the detailed fax history reporting included in ExpressFax, providers can review all faxes that have already been delivered alongside those which might have failed, eliminating the potential for errors from mishandled or orphaned faxes while accelerating document delivery.

"With ExpressFax's automation tools, we've all but eliminated the inefficiencies in our document delivery process. ExpressFax has been a great solution that has provided our referring physicians with more reliable feedback and an immediate ROI," declared Patrick Toomey, COO of the Virginia Cardiovascular Specialists.

### **About Entrada**

Entrada provides innovative workflow solutions that protect physician productivity and revenue by enabling physicians to continue dictating before, during and after the migration to an EHR. Entrada's cross-platform solution, available for Apple iOS, Windows Mobile and PC platforms, enables the capture of the narrative portions of the note, woven alongside structured data, to support chart completion. Alternatively, Entrada's Real-Time Speech-to-Text enables physicians to quickly populate text within EHR templates for those who wish to self-edit. Unlike traditional voice-rec solutions, Entrada's cloud-based engine is accessed through a simple web app, ensuring

a quick and painless installation. For more information, visit [www.EntradaHealth.com](http://www.EntradaHealth.com).
