OLIVE ONE

The world's first all-in-one HD Music Player. Designed by you.

All together now

Olive ONE is a music solution by the people, for the people. Powered by the crowd — and an open architecture — its creation is driven by music lovers, artists and app developers worldwide. Our vision is to create the absolute best music experience available. At an affordable price. Calling music lovers everywhere. Let's make this thing happen.

All-in-ONE

Play all your music through one simple touch-screen interface. We mean ALL your music. MP3s, FLAC, ALAC, WAV, AIFF, and iTunes tracks. The streaming services you use, like Spotify, Pandora, and YouTube. Cloud services. All controlled from your iPhone, iPad, Android device, or directly from the ONE touchscreen. Just connect speakers and you're good to go.
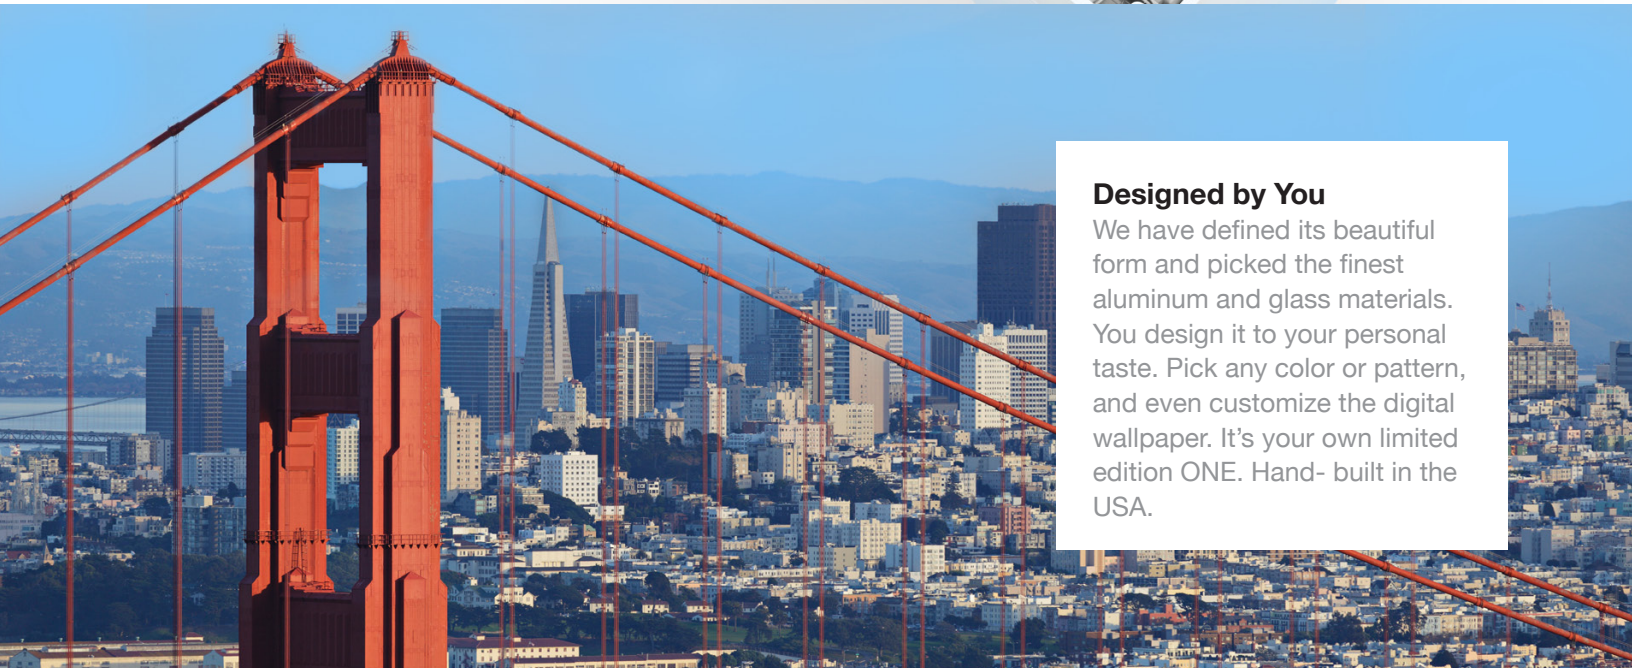

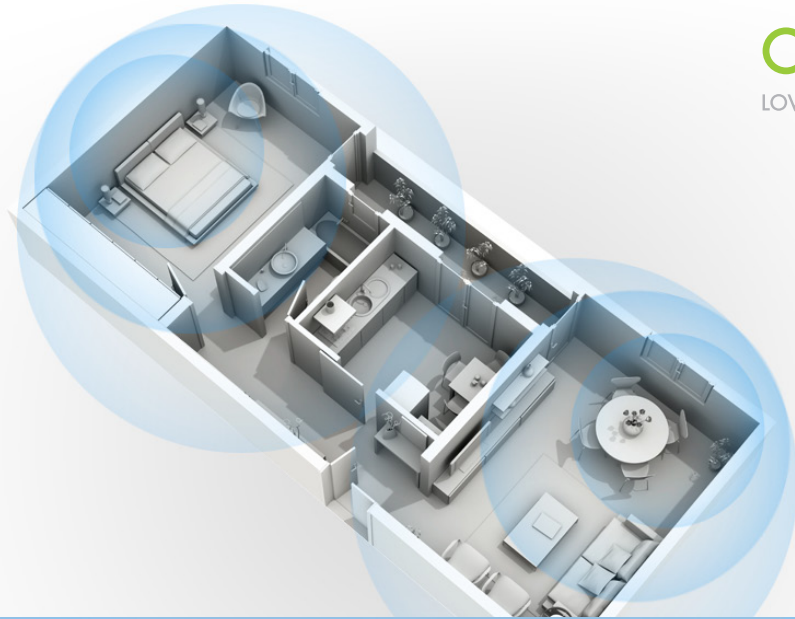

Smart. Social. Open.

Powered by our new ultra-fast ONE Music Operating System. Olive ONE automatically learns your music taste, and integrates with your social networks. Its open source foundation opens worlds of possibility for new music apps and interaction with your favorite artists. In other words, ONE is amazing now, and will only get better.

Unbelievable sound.

Long beloved by audiophiles, Olive brings its award-winning HD sound technology to music lovers everywhere. Featuring a 32-bit/384kHz DAC by Burr-Brown and dual HD amplifiers Olive ONE delivers your favorite music in stunning quality.

ONE + ONE + ONE...

Add ONE to multiple rooms to play the same or different songs. All controlled wirelessly from your ONE, smartphone or tablet.

Designed by You

We have defined its beautiful form and picked the finest aluminum and glass materials. You design it to your personal taste. Pick any color or pattern, and even customize the digital wallpaper. It's your own limited edition ONE. Hand- built in the USA.

We're just getting warmed up

Olive ONE is only the first step on our journey to develop the best music experience you can at home. We're developing many other great ideas, from a stack-able speaker system to beautiful LED modules to invisible mount-ing. Join us to make them happen.

HD Digital-Analog-Converter
