Affordability & Convenience

At Potomac College, it is one of our primary missions to make a post-secondary degree accessible to everyone. Student financial aid, tuition assistance, and scholarships available to those who qualify.

Potomac College offers the convenience of time, location, and program pace; factors that contribute to the overall success of students and help them balance their life with their education. We offer flexible schedules, which include online and on-campus classes.

Quality

The educational philosophy of Potomac College is to address the needs and learning styles of a diverse community of learners through the structure of its academic programs that integrate classroom theory and relevant practical experience.

We provide our students with an opportunity to develop their talents and abilities by providing relevant and challenging curricula. Our programs blend theory and applications into knowledge that is practical in today's business and governmental environments.

Potomac has a multidisciplinary faculty spanning the Washington, D.C. and Northern Virginia international and local business community, including the World Bank, ATT, Peace Corps, D.C. Government, Oracle, etc.

Choosing the right degree program

Choosing the right program is an important decision, one which depends on your personal goals. If you are presently working in your chosen field and are looking to hone your skills to advance your career, one of our *certificate programs* may be the right choice. These programs provide professional skills in a variety of areas and are intended for those who have an interest in gaining additional knowledge for career transition.

If, however, you are looking to enter the competitive work environment or change careers, then a *degree program* may be a better choice. We offer Associate and Bachelor degree programs designed to train and prepare students for successful careers in both the private and public sectors.
