

## Press Release

### Govsphere expands SU partnership with \$10,000 CCENT donation

**Syracuse, New York (December 15, 2012) - Govsphere, Inc.**, a dynamic and rapidly growing government consulting firm based in Syracuse, New York, today announced that it is expanding its academic research partnership with Syracuse University (SU) through a \$10,000 donation to the Center for Convergence and Emerging Networking Technologies (CCENT) laboratory. The contribution will allow SU graduate students within the School of Information Studies to work on next-generation information technology research and development (R&D) initiatives in collaboration with Govsphere personnel at its corporate headquarters facility in downtown Syracuse.

The special projects supported by the CCENT donation will include:

- Developing private cloud infrastructures that yield the benefits of cloud computing while maintaining control over corporate information.
- Utilizing real-time collaboration and network monitoring platforms to protect corporate networks from cyber-attacks.
- Building next-generation green IT infrastructures using recycled IT equipment and components.

“Govsphere is honored to partner with Syracuse University and the CCENT lab to expand our research and development efforts in the areas of cloud computing, cyber security and green IT infrastructure,” said Mr. George Mazeveski, President and CEO of Govsphere. “As our Firm continues our dynamic growth and expansion in Central New York, we appreciate the opportunity to give back to our community while inspiring the next generation of Information Technology professionals. We also look forward to sharing our lessons learned in these strategic information technology areas with our expanding base of Federal, State, and Local government clients as well as our strategic partners.”

For additional information regarding this initiative, visit Govsphere’s website at <http://www.govsphere.com> or the Syracuse University CCENT website at <http://dcc.syr.edu/>.

#### **About Govsphere, Inc.**

Founded in 2002, Govsphere, Inc. (<http://www.govsphere.com>) is a management, strategy, and technology services firm that delivers innovative solutions that meet the complex needs and challenges facing today’s government agencies. Using our POST® Methodology, Govsphere delivers business process analysis and reengineering services, organizational development and talent management solutions, strategic and enterprise planning, software development and integration, and program management oversight and support. Our industry leading, next-generation solutions transform business processes and break down information silos by fostering a collaborative environment that encourages information sharing and transparency.

### **About Syracuse University**

From its founding in 1870, Syracuse University has been the embodiment of Scholarship in Action—education that transcends traditional boundaries through a combination of innovative thinking, daring choices and entrepreneurial attitude. Our iconic campus is nestled amongst the rolling hills of Central New York—itself a crucible of historic change and progress. Building on that foundation, SU continues to create opportunities for students and faculty to push limits, build pathways, and make connections that lead to new discoveries and transformational change.

### **About CCENT**

The Center for Convergence and Emerging Network Technologies (CCENT) is an initiative by the School of Information Studies to research on how inter-operable systems and technologies are converging to provide solutions for industries and economies. CCENT's mission is to understand the future of networking technologies, and to engage students, faculty and industry in the process of defining and shaping that future. The Center's research is interdisciplinary and applied, focusing on the management and use of networks and communication as well as relevant public policy and industrial organization issues.
