Choren Biomass Gasification Plant

FREIBERG GERMANY

Choren's Beta Gasification Technology was used in sustainable CO₂ neutral fuel production from organic feedstock. Decommissioned in 2011 the plant and equipment, much of which is less than 2 years old, some was never installed and is brand new, is being liquidated and sold at a deep discount.

**Huge
Quantity
of Newer
Equipment**

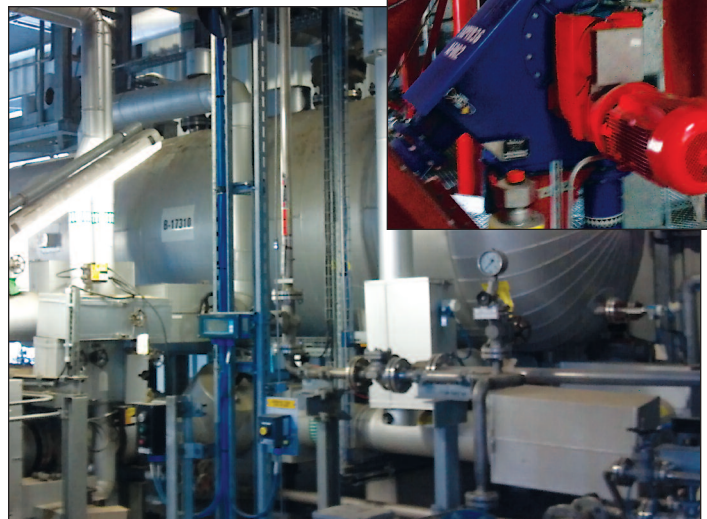

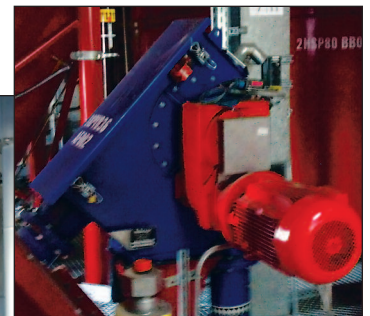

- Aggretech/MTU 1400 Emergency Generator
- V340 Emergency Generator
- Aerzen / Siemens Geafol Transformers
- Switchgear: low and medium voltage
- Elektrotechnik / Automatisierung
- Kaeser CSD 102T BSD72T
- Diesel Fire Pump, FH-AD 1086-07
- KSB Pumps, Etanorm MX 150-400
- Holzhauser Pressure Maintenance Pump, FH-VJ-2-25/12
- Wastewater System, Gutling / LED Italia TC 60,000
- Cold Water Systems
- Chiller Grasso FX PP 2X350 Duo
- Heat Exchangers
- Cooling Towers
- Fan Coolers
- (4) Nitrogen Compressors, VPT 55-14 RS C
- Bauer GIB15.3 Nitrogen Compressor w/Storage Battery

Some Equipment Never Installed

- Hydrogen Diaphragm Compressor, MKZ 630-10/280-40 Hofer
- Thermal gas Disposal Flare System
- 3-Stage Steam Turbine Generator
- Tank Farm: (5) Storage Tanks w/100 Cubic Meters, 500 m³ Flat Bottom Tank
