Oxygen Forensic Suite 2013 Offers Significantly Enhanced Evidence Searching, Becomes Faster and Easier than Ever

Oxygen Software announces a major upgrade to its flagship mobile forensic product, Oxygen Forensic Suite. Version 5.0 of Oxygen Forensic Suite 2013 introduces significantly improved global search capabilities allowing investigators finding many types of evidence located in multiple devices with a single search. In addition, the update brings an all-new look to its main desktop, accommodating for larger screens and multiple-display configuration with the choice of icons in multiple sizes. Other new features include simplified navigation and Card View PDF export.

The new release of Oxygen's flagship forensic tool is more powerful and easier to use than ever, offering a range of enhancements over the previous 2012 release. The new product brings in some greatly extended global search capabilities, offers simpler navigation and becomes easier to use in high-resolution and multiple display configurations. A new Card View option is added to PDF export engine to allow for cleaner, simpler reports.

Enhanced Global Search

Oxygen Forensic Suite 2013 v.5.0 takes searching capabilities to a whole new level, introducing multiple additional types of searches compared to the earlier release. With version 5.0, investigators will be able to search the entire database of devices for exact matches, run loose searches with OR and AND logical operators, and search all data sources for specific types of information such as e-mail addresses, phone numbers, credit card numbers and geo coordinates. The new and improved search capabilities make locating evidence faster and easier.

New Reporting with New PDF Export Option

Oxygen Forensic Suite 2013 adds a new PDF export option, allowing PDF reports to be saved in Card View mode. The new Card View more offers cleaner and more convenient data representation. The new mode can be enabled or disabled individually in each section's Report settings.

The added exporting mode makes PDF reports look cleaner and much easier on the eye. The new reports make it much easier to switch between different sections, and make different persons and their contact information appear in a more prominent distinct manner. Overall, the new reporting mode offers a sharp, concise and distinct view on acquired evidence both on paper and on the display.

Improved Desktop

In year 2013, many forensic specialists are already using big-screen displays or multiple display configurations. Oxygen Forensic Suite 2013 can now make use of the extra space by offering the choice of different view modes. The three view modes allow achieving better representation with the user's screen size and resolution as well as display configuration.

Simplified Navigation

Several frequently used functions such as "Search", "Key Evidence" and "Communication statistics" are now moved from tabs to sections list and can now be applied to the entire case.

About Oxygen Forensic Suite 2013

Oxygen Forensic Suite 2013 helps investigators and forensic specialists access and analyze data from a variety of mobile devices such as cell phones, smartphones, communicators, PDA and tablet PCs. Currently supporting more than 6,300

different models, Oxygen Forensic Suite 2013 covers the widest range of mobile devices compared to competition, and allows fully automated acquisition and analysis of supported devices.

The unique Timeline feature offers convenient, single-place access to all activities and movements performed by the user arranged by date and time. Investigators can track user location at every moment, build and map their historic routes, and clearly see all activities performed by the user at each location. Timeline is now available for analyzing DMG images.

Another signature feature of Oxygen Forensic Suite allows investigators performing a global search on all devices ever analyzed with the toolkit. The global search quickly reveals any connections (e.g. common contacts, exchanged calls, texts or emails) between the phone owners.

Oxygen's statistical analysis tools allow investigators discover social connections between the users of multiple mobile devices. Calls, text messages and Skype conversations are analyzed to produce charts and tables revealing the users' closest circle at a glance.

Oxygen Forensic Suite 2013 guarantees zero-footprint operation, leaving no traces and making no modifications to the content of the devices, making it the tool of choice among government and law enforcement agencies, security services and forensic organizations in more than fifty countries.

About Oxygen Software

Founded in 2000, Oxygen Software offers the most advanced forensic data examination tools for smartphones and mobile devices. The company is dedicated in delivering the most universal forensic solution covering the widest range of mobile devices running Symbian, Windows Mobile, Blackberry, iOS, and Android operating systems. As a result, Oxygen Forensic Suite receives great response at forensic conferences, exhibitions and trainings, and occupies a spot in the top of the list in relevant tests for extracting more data than competitors.
