

Cloud365TM

We'll help your business soar to new heights...

Dataprise Cloud365TM managed cloud services brings two decades of experience in supporting business technology – both on the ground and in the cloud. We understand exactly what your IT assets need: protection, reliability, scalability and affordability. We can help you grow your business in the cloud without the need for investing in new infrastructure, maintaining

complicated systems, and in many cases hiring in-house technical experts.

Dataprise Cloud365TM gives you the right technology, tools, approach and expertise when transitioning to a cloud-based environment helping your business to do more than just succeed in an extremely competitive marketplace.

Business Continuity Services

Your data is arguably your most valuable business asset, which is why we do more than just back up your data – we protect it as if it were our own.

Cloud Application Support

Are you leveraging cloud-based tools for their convenience and cost savings? We can help you set up, maintain and support your preferred cloud applications.

Internet Security Services

The increasing complexity of networks and internet facing software applications creates an ever-changing landscape of security exploitation. Let us protect you.

Hosted Email Solutions

Dataprise offers feature rich and multi-compliant email solutions. We can host your entire organizations' email in a reliable and secure off-premise environment.

Data Center & Hosting Services

Need help to proactively manage your data center/co-location? Let Dataprise manage your critical servers, applications, and other off-premise technology assets.

Support365[®] Monitoring Tools

Looking for enterprise-level network monitoring capabilities? We offer highly-customizable network monitoring, reporting and remediation tools.
