

DSMAC integrative mobile crusher sweeps across the global market

With the development of crushing technology, integration, intelligentize and hydraulic unit are the development tendency of the [mobile crusher](#) and crushing plant in the mining and construction industry.

With more than 16 years' profound management and technology accumulation, DSMAC has high starting point of the crushing technology and accurate market positioning of mobile crusher. Aimed at the world famous band in the mobile crusher area, DSMAC have researched and developed the most competitive mobile crusher products and service in the global mining and construction industry, which have become the worthy choice for mining and construction investors.

Mobile crusher manufactured by DSMAC is the most advanced and high-efficient crushing and screening system and its main technical parameters have reached or closed the same level the developed country like America and Germany. The mobile crushers mainly include mobile jaw crusher, mobile impact crusher, mobile sand making machine, mobile cone crusher and portable screening plant, which feature high reliability, better performance, compact structure and the modulization design. It is convenient for improving wear resistant parts and reducing routine maintenance.

DSMAC mobile crusher is widely used in the mining, building materials, metallurgy, transportation, coal, chemical and environmental protection industries. "Treasure our clients, bring them wealth and happiness!" is our slogan. DSMAC has provided customers with excellent products and service and always insist on the tenet of "win-win cooperation with our customers".

DSMAC integrative DMP900 series mobile crusher exported to Indonesia

With outstanding performance on Bauma China 2012, DSMAC has successfully exported DSMAC integrative DMP900 series mobile crusher exported to Indonesia. The whole collocation include GZ80 electromagnetic [vibrating feeder](#) + PE400*600 jaw crusher + PYT900 cone crusher + 2YK1230 circular vibrating screen, the capacity can range from 30 TPH to 40 TPH. The maximum input size is 300mm and the output size can be 20-30mm. With high cost-performance, the DMP mobile crusher plant has been highly spoken by customers.

ABOUT DSMAC

DSMAC is a famous brand and high-tech enterprise, which specializes in researching and producing new type high grade mobile crusher. This trustworthy mobile crusher manufacturer and wholesaler adhere to the principles of introducing advanced foreign technology and combining the actual situation. DSMAC high efficiency crushing equipment, grinding equipment, screening equipment, and various new high-strength wear-resistant materials accessories all reach the leading domestic level; some have been close to the international advanced level.
