News / Proposal for Product Review

Title: **Text message based customer loyalty program that runs in store on tablet PCs**

Details: In Store Rewards is a fully automated Text Message based Customer Loyalty Program that enables business owners to effortlessly build their SMS contact list *on the fly* whilst their customers go about their business as usual. Business owners will be able to instantly reward their customers for their visit to their business, and/or for any purchases they have made on the day. And come the dreaded "slow business times" business owners can send SMS / Text messages to all their customers in just seconds to "call" them back to the business for any offer, sale or event that they run for them.

No restrictions or limits as to who can use In Store Rewards!
Our fully automated Text Message based Loyalty Program - In Store Rewards - can be applied to virtually any business that relies primarily on walk-in-customers. There is no limit to the type of business using In Store Rewards and there are no limits for a business owner as to what one can offer as a reward to their prospects and customers.   SMS contact lists are built on the fly and customers are rewarded at the same time!   It all equates to a *'win x win'* scenario for both business owners and customers alike.

No restrictions or limits where to use In Store Rewards!
In Store Rewards can be used anywhere in the world where mobile phones are in use to send and receive SMS - the language one likes to use for the backend of the In Store Rewards or your Rewards Site also does not matter as we can adequately cater for any language.

We speak English ~ Wir sprechen deutsch ~ Hablamos español ~ نحن نتكلم العربية ~Si parla italiano ~ Kami berbicara Bahasa ~ مہ اردو زبان بولتے ہیں ~ हम हिन्दी बोलते हैं ~ Мы говорим на русском ~ 我们说中国 ~ Vi snakker norsk ~ Μιλάμε ελληνικά ~ We speak... well you get the idea, right? In Store Rewards can speak any language our customers require. If a language of choice is missing then we will make it happen... In short *"we speak the language of our customers."*

Our System can be applied worldwide in any country or language and it is not bound to an expensive Apps. There are no limitations and customers are free to design their own customer loyalty sites. All our customers need is a tablet PC (virtually any tablet PC will do) and an In Store Rewards Account.

For further details on how In Store Rewards works and how it is offered to local business please refer to our website: https://in-store-rewards.com

And we have online desktop demos available for you:
