the lawn makers

Why choose turf?

A vibrant and healthy lawn is an asset to any garden whether it is large or small, contemporary or traditional, for work, rest or play.

Grass is probably one of the most sustainable ground cover materials there is; nothing has been cut down, killed or dug up to produce grass seed or turf. A lawn won't

need painting with preservatives, it absorbs carbon dioxide from the air and releases oxygen, unlike paving or decking a lawn soaks up rainwater instead of diverting it into drains, it acts as a living air conditioner on hot days and for sporty types, the surface of a lawn is like a shock absorber reducing stress on muscles, joints and cartilages.

Why choose Q Lawns?

Q Lawns are one of the UK's largest producers of turfgrass for amenity and home lawns. Our products are used nationwide to create elegant but practical lawns for prestigious homes, parks and gardens, commercial landscaping projects and show gardens.

Q Lawns' turf has been the first choice for landscape professionals for almost two decades. Why? Because we pay attention to detail from the very beginning of the growing process – before we even start sowing the seeds. And then we keep paying attention to detail until our turf is delivered safely into your hands.

At Q Lawns we pride ourselves on our high standards of customer service. As our business has grown, we have introduced quality new products to make it easier for you to create and maintain a beautiful garden. Topsoil, grass seed, woodchip mulch and Nutrifusion lawn feeds can be ordered online via our secure website, by phoning us on 01733 490006 or by contacting your local Q Lawns stockist.

How to order

The first step is to carefully measure your lawn to work out how much turf you need to order.

Multiply the width by the length to find out the area.
Add an extra 5% to allow for trimming and wastage.

So: if you have prepared an area **12 metres long by 5 metres wide**

The area is **12m x 5m = 60m²**, then add **5%**

60m² x 5 = 100 = 3m² – this is the **5%** for trimming

You will need at least **60m² + 3m² = 63m²** of turf.

There is a turf calculator on our website at [www.qlawns.co.uk](http://www qlawns.co.uk) alternatively, phone one of our staff on **01733 490006** for help calculating the amount of turf you need.

Seed or turf can be ordered direct from Q Lawns by phoning **01733 490006**, buying online at www.qlawns.co.uk or by contacting your local **Q Lawns** stockist.

Most deliveries can be made next working day, provided your order is received before 11am. We will endeavour to contact you in advance to ensure you know when to expect your turf. Remember, turf is perishable and **MUST** be installed within 8 hours of delivery.

How to create the perfect lawn

Our guide to creating your perfect lawn details how to prepare the area, what type of turf or seed to choose, how to lay your turf, and how to care for a new and established lawn plus a Frequently Asked Questions section.
