## Valdata Systems Director Publishes Article on Preventing Recalls in Manufacturing

*Manufacturing Transformation forum publishes article written by Valdata's Marketing Director entitled "Preventing Recalls through Real-Time Quality Control"*

**January 16, 2013:** Valdata Systems Marketing Director Susan Balsamello was recently published in Apriso's Manufacturing Transformation forum. The article discusses the main culprits behind human-error based product recalls. The feature investigates the most common causes of human-error based recalls, and provides methodologies to prevent errors using real-time quality controls.

Remedies are available to manufacturers in the quest to mitigate human error including container-level barcode tracking and manufacturing systems tied to inventory and quality records, to name a few. The article provides a list of features which should be required when shopping for a good chemical management system.
