

Powerful Performance Comes in Small Packages

ATAGO's new polarimeter offers robust performance and ultimate efficiency in small footprint.

Thanks to improvements made in structural design, the POL-½ needs only half the space of a conventional model. The space-saving design promotes installation flexibility. A lightning-fast response time of 60° per second optimizes operational efficiency.

Looks can be deceiving.

Though it is half the size of a traditional polarimeter, the POL- ½ provides better resolution than most.

There is no time to waste.

The response time is 60° per second. That is 15 times faster than before.

It cannot be easier. The LCD touchscreen color display makes all operations fast and easy. Data transfer is simple with the use of a USB flash drive. The sample temperature is measured directly and accurately.

Always aim high.

With new optical technology, the world's highest class resolution of 1/10000° has been achieved.

• Get validated. Stay compliant.

We provide Installation Operational Performance Qualification (IQ/OQ) documentation and support to ensure compliance with all appropriate regulations.

Powerful Performance Comes in Small Packages

POL-1/2 Cat.No.5271

Concept

With a 100mm cell, measure at an accuracy of $\pm 0.002^{\circ*}$ and resolution of 0.0001°.

* Less than 1° angle of rotation

Compliance with pharmacopeias and other regulatory requirements worldwide is within easy grasp.

Temperature Control

The optional Peltier thermostatic cell holder delivers perfectly temperature-controlled measurements.

This Peltier thermostatic cell holder does not require the use of water. Enjoy stress-free temperature control without worrying about a water leak or cleaning.

POL-1/2 p Cat.No.5271 (thermostatic cell holder package)

measured.

temperature control.

Target temperature

100mm square cell

Advantage of using a square cell The thermostat is in contact with the bottom and both sides of the cell, enabling quick and accurate

Temperature sensor for sample (standard accessory) Choose either the temperature of the cell holder or the temperature of the sample liquid itself to be

Measurement results when using a thermostatic cell holder

- The closer the sample temperature is to the target temperature, the more quickly the stability is obtained.

The hollow-shaft motor turns the analyzer directly. Measure at 60° per second, the best response speed in its class.

LED light source *Only 589nm is available

explicitly listed in traditional pharmacopeias, it is regarded as compliant in a practical sense for the with the results obtained with other measuring devices listed in pharmacopeias.

Polarizing plate A polarizer with a high extinction ratio is used

Interference filter

A high performance filter with a FWHM of 2.5nm is used.

Cell

Mechanism

The hollow-shaft motor delivers industry's fastest measurement.

In addition to the standard square shape, cylindrical cells are also available upon request. Choose from 10mm, 20mm, 50mm, or 100mm. The exact cell length is entered in the unit

for measurement. *The exact optical path length cannot be entered in the unit.

The volume capacity of a standard cell with an optical path length of 100mm is approximately 12ml. The smallest cell is 10mm in optical path length and 0.1ml in volume. Cells are available in various volume capacities of 0.1 to 30ml to meet many different application needs.

Function

The color LCD touchscreen delivers quick and smooth operations.

Wth the intuitive user interface, it is extremely easy to view measurement results and adjust settings.

Data storage and export

Angle of rotation, specific rotation, concentration, International Sugar Scale readings as well as statistical computation results can be exported. Measurement results can be either saved as a CSV file to a USB flash drive or printed to a printer (sold separately). USB flash drive (1GB/FAT16) is standard accessory.

A wide variety of cell options, thermostatic cell holder, and printer deliver optimized measurement and data processing solutions.

Part No.	Product Name	Detail
RE-86010	Square type cell holder	For square cell, without cell lid, applicable for circulated water at constant temperature (same as standard supplied holder)
RE-82100	Square cell 100	Optical path length 100 nm, sample amount 12 mL, without cell lid (spare)
RE-82101	Square cell 50	Optical path length 50 nm, sample amount 6 mL, without cell lid
RE-82102	Square cell 20	Optical path length 20 nm, sample amount 2.4 mL, without cell lid
RE-82103	Square cell 10	Optical path length 10 nm, sample amount 1.2 mL, without cell lid
RE-88100	Square cell lid 100	For square cell 100, made of fluorine resin, with a hole for temp sensor probe
RE-88101	Square cell lid 50	For square cell 50, made of fluorine resin, with a hole for temp sensor probe
RE-88102	Square cell lid 20	For square cell 20, made of fluorine resin, with a hole for temp sensor probe
RE-88103	Square cell lid 10	For square cell 10, made of fluorine resin, with a hole for temp sensor probe
RE-88200	Plug for cell lid, 2pcs	For cylindrical and square cells, spare
RE-89100	Temperature sensor for sample	For sample temperature measurement, standard accessory (spare)
RE-87000	Cell holding parts	For sample temperature measurement, using 10 mm / 20 mm square cell
R-82104	Square micro cell 100	Optical path length 100mm, sample amount 2mL, cell lid included, the aperture for square micro cell required
RE-82105	Square micro cell 50	Optical path length 50mm, sample amount 1mL, cell lid included, the aperture for square micro cell required
RE-86103	Aperture	For square micro cell
RE-86011	V-type cell holder	For cylindrical and jacket cells
RE-88014	Cylindrical cell 100	Optical path length 100mm, sample amount 29.8mL, without cell lid, V-type cell holder required
RE-88015	Cylindrical cell 50	Optical path length 50mm, sample amount 14.9mL, without cell lid, V-type cell holder required
E-88016	Cylindrical cell 20	Optical path length 20mm, sample amount 6.0mL, without cell lid, V-type cell holder required
RE-88017	Cylindrical cell 10	Optical path length 10mm, sample amount 3.0mL, without cell lid, V-type cell holder required
E-88108	Round cell lid	For cylindrical, jacket, and square micro cells, made of fluorine resin, with a hole for temperature sensor probe
RE-82106	Jacket cell A1	Optical path length 100mm, sample amount 6.4mL, V-type cell holder required
RE-82107	Jacket cell A3	Optical path length 20mm, sample amount 1.3mL, V-type cell holder required
	lacket cell B1	Optical path length 100mm, sample amount 2ml. V-type cell holder required

Cells

TCS-1 thermostatic cell holder (as an individual item)

Included as a standard accessory. Available for purchase separately.

DP-AD24 dot matrix printer

Prints out measurement data. Data can be exported to either this printer or a USB flash drive.

Accessories

The Peltier thermostatic cell holder included as a standard accessory is also available for purchase separately.
