

About Cetrom Information Technology, Inc.

Cetrom Information Technology, Inc. (Cetrom) was founded in 2001 based on the vision that there was an easier, more cost-effective option to manage technology resources. Today, the company is a leader in providing Cloud Computing solutions and technology services for companies of all sizes, across multiple industries. By delivering a full spectrum of IT services as an operational expense, just like a utility company, Cetrom enables businesses to pay only for what they need and not have to worry about administrative tasks such as licensing or security. This eliminates the need for companies to maintain large internal IT departments and alleviates the stress associated with the recurring capital expenses necessary to upgrade hardware and software at the end of their lifecycles.

With enterprise-class security, instant access to over 150 applications, support for the mobile workforce, the ability to virtualize custom applications, and traditional system maintenance, Cetrom has created a best-in-class technology infrastructure backed by a 99.9 percent uptime guarantee.

Headquartered in Vienna, Va., the company has offices and SAS 70-compliant data centers across the U.S. Cetrom is a Microsoft Partner with multiple Gold Competencies, a Blackberry Alliance Program Member, and partners with leading technology providers such as Citrix, Dell, EMC² and CenturyLink.

Christopher Stark: *Founder, President & Chief Executive Officer*

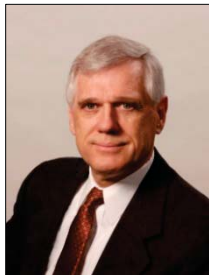

The true visionary behind the company, Stark knew there was a different way to manage technology that would provide instant access to valuable IT resources anytime, anywhere, anyhow. Little did he know he was looking at the future of IT. Today, as Cloud Computing is just gaining speed, Stark has already grown Cetrom into a leader in Cloud solutions with success that can only be attributed to his personal resolve and ongoing commitment to maintaining excellent customer service and a best-in-class technology infrastructure. Backed by over 25 years of experience in all facets of IT, with some of the industry's most prestigious technical certifications, Stark has his finger on the pulse of the IT industry and eyes toward the future.

Mark Wright: *Vice President of Information Technology*

The technology guru, Wright leads the strategic technical direction of the company, handpicks the knowledgeable engineering staff and is responsible for maintaining the company's guaranteed 99.9 percent uptime. His oversight and direction of the Cetrom infrastructure has created a network that is one of the best in existence. Wright's experience in the security industry and more than a decade in IT provided a foundation that emphasizes the importance of data security, high-availability networks and immediate access to valuable resources. Wright holds certifications from Microsoft® and Citrix®, and to this day retains his initial enthusiasm in IT, bringing not just experience, but a true passion for technology to the future of Cetrom.

Jerry Shipley: *Director of Business Development*

Jerry Shipley is responsible for business development and sales. Jerry has produced positive, bottom line results in Fortune 500 companies, startup companies and in consulting and partnering with clients at local, national, and international levels. He carries experience in 13 vertical markets or industries (e.g., telecom, SaaS, health care, utilities, maritime). Shipley delivers value to his customers by applying his extensive experience in strategy, marketing, sales, communications, partnerships, business management, and organizational change and effective leadership to produce personalized, meaningful results.
