

High performance patient care through real-time alerts.

A safe and secure communications solution that reduces the steps, time, and energy to complete care activities.

Sample Patient Care Practices Enabled by Our Clinical Collaboration System™

Nurse Call Notification

- Combines **alerts** from Nurse Call systems and HIS/EHR or other clinical data and sends notifications to designated clinicians

PRN Effectiveness

- Follow-up **reminder** notifications from Vista CPRS

PACT Enablement

- Empower **PACT** team members with enterprise collaboration improving access, coordination, and care

STAT Order Notification

- **Instantly** alerts a nurse when a STAT order has been placed

Critical Lab Results

- Sends **instant** notifications of critical lab values to designated clinicians

Report Availability Notifications

- Sends **full** radiology, cardiology, and pathology reports

Just let me say – whatever we paid for this, it is worth it for the text option alone. It is SO nice to be able to contact all staff at one time.”

Nurse Manager, Gainesville

CCS CLINICAL COLLABORATION SYSTEM™

Top 5 Benefits of CCS

1. Improve patient **outcomes** and **satisfaction**
2. Simultaneously alert all staff with **in-context group** messages
3. Achieve enterprise-wide economic **efficiencies**
4. Deliver and track **actionable** data on time and to the right targets throughout the healthcare enterprise
5. Increase hospital quality **ratings** and **funding**
