## Acoustica and MXL Microphones announce Mixcraft 6 Vocal Studio at NAMM Show 2013

*-- joint product venture integrates custom-designed MVS USB Condenser Microphone by MXL with Acoustica's award-winning Mixcraft 6 music production and multi-track recording software --*

**Anaheim, CA** – Acoustica and MXL Microphones have teamed up to create **Mixcraft 6 Vocal Studio**, a stream-lined software and hardware package that turns any PC into a powerful and easy-to-use recording studio. Packed with pro-quality effects, authentic virtual instruments, thousands of audio loops and sound effects, and a high-end versatile USB recording microphone, Mixcraft 6 Vocal Studio provides musicians with everything they need to create professional mixes with ease. MSRP \$199.95 MAP \$169.95

The **MVS USB Condenser Microphone by MXL** is custom-designed for Mixcraft 6 Vocal Studio and includes many of the same features as MXL's high performance studio microphones. The MVS Microphone has a wide frequency response to capture vocals and instruments with impressive clarity. The cardioid polar pattern makes it simple to target the source of sound and minimize periphery noise. Simply plug into the USB input to any computer. MVS Microphone features:

Diaphragm:	6 micron gold sputtered	Frequency Response:	20 Hz–20kHz
Bit Depth:	16-bit	Size:	60mm x 130mm / 2.36 in. x 5.11 in.
Sampling Rates:	44.1kHz / 48 kHz	Weight:	16 oz / 1 lb
Signal to Noise Ratio:	84dBA	Metal Finish:	Black
Polar Pattern:	Cardioid	(includes stand, adjustable mount, USB cable)	

**Mixcraft 6** can record unlimited tracks, arrange loops, remix tracks, compose with MIDI and virtual instruments, add effects, score and edit video, and mix and master tracks to create polished, professional compositions. Mixcraft 6 includes over 6000 professionally produced loops and sound effects, 11 virtual instruments and 25 high-quality effects. Professional features include ReWire hosting, multi-take loop recording, time stretching/pitch shifting, support for unlimited hardware inputs and outputs, support for multi-channel VSTi's, and much more.
