Iris Data Services Releases ISIS – Managed Services Software Provides Automated Evidence, Storage, and Project Tracking
Managed Litigation Services Company Enhances Process Management Tools

NEW YORK, January 28, 2013 — Iris Data Services, a leading provider of managed litigation services, announced today it has released the **Iris Storage Information System**— **ISIS**, a comprehensive discovery management application. Fully integrated with Iris' leading eDiscovery process management tool, **Iris eBoard**, **ISIS** gives **Iris Discovery Management** clients the ability to easily manage and allocate their physical and electronic storage across multiple platforms. **Iris Discovery Management** includes discovery consulting, eDiscovery processing, data hosting using the industry leading kCura Relativity platform, data analytics, and attorney document review. Iris Data Services is a leading supplier of discovery solutions including electronic discovery, managed litigation services, and document review technologies including kCura Relativity, Relativity Analytics, and Relativity Assisted Review.

"**Iris eBoard** is the foundation of daily processing and project management for **Iris Discovery Management** customers," said Major Baisden, president of Iris Data Services. "**Iris eBoard** tracks and generates reports for every stage of electronic discovery, showing Production and Project Managers the real-time status of every phase of discovery, all viewable from **eBoard's** comprehensive **Dashboard**. **Iris Storage Information System**— **ISIS,** adds true matter management to this powerful process management tool.

"**Iris Discovery Management** customers enjoy the flexibility of having multiple tiers of storage. **ISIS** manages all physical and logical evidence, the data processed during electronic discovery, and the resulting data sets," continued Baisden. "**ISIS** gives Case Managers a real-time snapshot of exactly how much data they are managing and the locations and types of that data for any given project (i.e. evidence locker, processing drives, review hosting storage, archives, etc.). Further, they can then set policies to manage the movement of that data; thus saving high-cost storage for active cases and using lower cost storage for dormant matters.

"**Iris eBoard** and **ISIS** are essential process management tools for every Iris managed services client. They give case team's complete control over their processing environment, putting production control and data tracking at their fingertips," summarized Baisden. "These workflow tools are the 'glue' for our managed services clients, giving them complete control over their discovery infrastructure and process."

About Iris eBoard Project Management

Iris eBoard Project Tracking monitors and reports detailed information on all matters in production. **Iris eBoard** centralizes all project details including communication, production tracking, evidence tracking, reporting, project management, equipment & personnel allocation, error tracking, team member training, quality control, and billing. **Iris eBoard** is fully customizable and tailored to fit the client's specific work environment and project flow. There are multiple "stages" within **Iris eBoard** containing project tracking, auditing and QC steps within each stage. Production Engineers and Case Managers use **Iris eBoard** to follow every step of the production process using these detailed "stages" of **Iris eBoard** that outline every process. Each data point records who completed each step. These stages and detailed steps are process, production and QC focused. **Iris eBoard** also to tracks errors found in QC allowing managers to hold team members accountable, as well as provide feedback and ongoing training.

About Iris Storage Information System — ISIS

The **Iris Storage Information System (ISIS)** is a case matter management system tailored to the unique challenges of eDiscovery. **ISIS** allows case teams to inventory all matter evidence and data stores, create an online chain of custody for every piece of physical and logical evidence association with a matter, set policies to automatically move data across storage tiers, and track project history. **ISIS** constantly maintains status information on all data kept on all network storage volumes (drive and volume information, directory location, data size information, access history, etc.). **ISIS** keeps running totals of data sizes not only in traditional measures such as gigabytes and terabytes, but also by the number of documents and the number of pages, essential information in document review planning. **ISIS** also has a programmable notification system that allows the client to define and setup notification rules when certain data thresholds and milestones occur based on the size, age and/or the stage of production of all data occupying storage on the system.

About Iris Discovery Management

Iris Discovery Management (DM) is a managed services platform for law firms and corporations who are dissatisfied with the internal capital and overhead expense or the continual investment and time spent outsourcing discovery needs. **Iris Discovery Management** blends best of breed solutions and technical expertise with the ability for litigation departments to evaluate current electronic discovery spend, ultimately increasing their client serving abilities. Unlike outsourcing every discovery service or paying higher capital investment to keep it internal, Iris has assembled a subscription-based package that includes discovery consulting, forensics collection & culling, eDiscovery processing, data hosting using the industry leading kCura Relativity platform, data analytics, and attorney document review.

About Iris

Iris Data Services is a leading supplier of discovery solutions including electronic discovery, managed litigation services, and document review technologies. Lead by recognized experts in electronic discovery and document review, Iris continually strives to defensibly reduce the amount of reviewable data on every matter. As a Premium Hosting Partner and Certified Reseller for kCura Relativity®, Iris' extensive document review expertise includes complex search consulting, computer-aided review technologies, and experienced attorney review teams. Iris' discovery experts, project management team, and use of technology have combined to make it one of the fastest growing companies in the industry. In 2011 Iris Data Services made the Inc. 500 list of the fastest–growing private companies in America, making Iris the fastest growing eDiscovery company in the United States. Iris is headquartered in Kansas City and maintains offices throughout the United States and Asia. For more information about Iris, please visit www.irisds.com.
