Shiseido Subsidiary Achieves Impressive Results Using Valdata's Chemical Management Sys

Davlyn Industries sees quantifiable improvements after installing Valdata's CMS Chemical Management System

January 29, 2013: Davlyn Industries, Inc. located in Monroe Township, NJ (a wholly owned subsidiary of Shiseido Company Limited) implemented Valdata's Chemical Management System ("CMS") in December of 2011. After auditing the effectiveness of the system Davlyn recorded impressive improvements.

Radio Hanzas, Executive Director of Manufacturing & Facilities reported:

"I am happy to say we are realizing

- **100% weighing accuracy and Documentation**
- **>25% weighing increase of pre-weigh containers / operator**
- **20% decrease in documentation review time**
- **Live inventory bulk data post batch mfg with no administrative / warehouse input**
- **Fully FDA reviewed during our recent audit with ZERO observations.**

The top three were based on first 3 months of post CMS compared to pre CMS of similar batching volume. There are other improvements realized and we expect the numbers to improve, as our operators gain experience and we tweak further improvements."

Davlyn achieved these results using Valdata's Manufacturing Execution System "MES" and the Warehouse Management System "WMS" modules.

About Valdata Systems
