

Unleash Innovation with the perfect blend of technology, process improvement and executive supply chain experience

Flexible Shipping Solutions for your Business Needs

ProcessWeaver and EBI Consultancy - Bundled Services

Process Weaver partners with EBI Consultancy to offer the most comprehensive multi-carrier manifesting inbound & outbound shipping solutions for ERP landscapes, complementing EBI's consultancy services and devotion to providing their customers access to best practices, world-class advice and end to end distribution solutions.

With a multi-carrier shipping solution all shipping stations can be consolidated into one! All shipments from all carriers can be picked-packed, processed and tracked all from within ProcessWeaver's suit of shipping solutions. The real-time connection to the carriers allows users to print carrier compliant labels as well as shipping documentation and track both inbound and outbound shipments from the familiarity of their current ERP interface. The solutions require minimal training as they integrate seamlessly with the ERP landscape.

EBI Consultancy assists its clients in becoming high-performance enterprises, by levering their unparalled level of business and industrial experience and providing high quality commercial, management, and supply chain consulting services, to help improve their clients shareholder value, operating cycles, financial performance and supply chain operations and networks.

In a fast-track world, EBI Consultancy makes it their business to support your business with the help of ProcessWeaver and their comprehensive suite of multi-carrier shipping solutions.

Key Benefits

- Consolidate shipping stations and print all documents regardless of carrier from one shipping station
- Centralized shipping labels rendered in real time
- Extendable to your suppliers inbound/ outbound shipping applications
- Enterprise Track & Trace (ETT) provides track and trace details, proof of delivery, signature information, and scan details from carriers.
- Enterprise Centralized Shipping (ECS) is a global multi-carrier shipping/manifesting system that automates freight quote, pick, pack, and ship. ECS is integrated with multiple carriers e.g. FedEx, UPS, DHL, USPS, TNT, Purolator, LTL, and TL as well as with freight forwarders.
