2011	ANX acquires TruArx (SaaS compliance capabilities)

Core Strengths

Security Experience

From its inception, security technology and customer support have been at the core of ANX's corporate DNA. ANX began as a security idea - created to exchange critical intellectual property between manufacturers and suppliers.

ANX currently manages 30,000+ secure end points and its solutions protect the intellectual property of companies transacting more than \$1 trillion in commerce each year.

Technical Excellence

ANX was a cloud innovator long before cloud services became popular. Many ANX services are controlled through an intelligent, cloud-based delivery architecture. ANX holds multiple security patents and is certified by the PCI Data Security Council as a Qualified Security Assessor (QSA) and Approved Scanning Vendor (ASV).

Unwavering Support

ANX is at its best when there's a vital need. Phone calls are answered quickly and 97% of issues are resolved on the first call. Customer satisfaction is a measurable metric across all functional areas. ANX is transparent, honest and accountable. Even the smallest customers in a value chain receive industry-leading Service Level Agreements.

Trusted

ANX has more than 16,000 customers today using its products and services to exchange vital information both internally and externally.

Financially Solid

ANX is owned by One Equity Partners, a private equity company that manages more than \$8 billion in investments for JP Morgan Chase & Co. ANX has a strong balance sheet and carries no debt.
