- Save as PDF, HTML, Excel, CSV and more
- GPS location coordinates*
- Ability to add signatures*
- Take picture images*
- Record video clips*
- Record audio notes*
- (*Apple iOS and Android OS)

For years AboutTime clients have been asking for a way to digitize their unique business forms. We are excited to announce the release of a new AboutTime module that extends digital form collection into the field and allows you to create custom form templates for collecting data such as work orders, accident reports, safety info, materials usage, inventory, inspections, surveys and much more.

On top of the core AboutTime mobile data collection system, FormsXPress allows you to capture custom data by building form templates for essentially any type of information you wish to collect. You can even control what employees have rights to populate data into your forms from their mobile device in the field. The forms can also be associated to an employee, job/location, task, and/or asset in the AboutTime system to create a seamless relationship. Forms can be printed and saved as PDF and other common file formats.

Receive accurate and legible digital forms from the field any time you want. It is fast and easy to build your forms and deploy them to specific employees in the field. Once a form is populated a simple sync sends the completed form into your office.

Manual data entry is inefficient for everyone, now your field employees can populate your forms on the same mobile devices they already use AboutTime for every day. In addition you can go far beyond the limitations of paper by capturing and adding rich content to your forms such as pictures, audio, GPS and digital signatures, all neatly organized and associated with employees, jobs/locations, tasks and/or assets in the AboutTime ControlCenter.

Stop using spreadsheets and paper forms for good. Call AboutTime today to see how you can leverage your existing AboutTime system to capture custom digital forms.

Build **CUSTOM** forms. Capture field data **YOU** need. Eliminate paper forms for good.
