FOR IMMEDIATE RELEASE

### **LAUREN RECEIVES EPC CONTRACT FOR NEW COGEN FACILITY AT HOLSTON ARMY AMMUNITION PLANT**

ABILENE, TX, FEBRUARY 5, 2013: BAE Systems recently awarded Lauren Engineers and Constructors (Lauren) an Engineering, Procurement and Construction contract for a new cogeneration facility at the Holston Army Ammunition Plant in Kingsport, Tennessee.

The scope involves supplying a natural gas-fired turbine/generator and auxiliary equipment, with all engineering and construction services necessary for the installation of a new plant. The plant will generate six megawatts of electricity and 70,000 pounds per hour of process steam. Engineering is scheduled to start in the first quarter of 2013, while construction will begin during the second quarter.

Lauren has been on-site at the Holston Army Ammunition Plant since mid 2012 as part of an additional construction contract with BAE involving a new facility to produce the acetic acid and acetic anhydride at the Holston Plant.

"This is the first combustion turbine/generator to be installed at the Holston plant," said Jerry Hobbs, Project Manager. "It will reduce emissions as well as operating expenses for Holston, and Lauren is honored to continue working with BAE at this site."

#### About Lauren:

Lauren provides engineering, procurement and construction services throughout a variety of heavy-industrial markets, including Power Generation, Polymers/Chemicals, Oil & Gas and Refining. For more information about Lauren, please visit us online at [www.laurenec.com](http://www.laurenec.com).
