DigiMed, LLC

Empowering Individuals to Better Health
# DigiMed, LLC
Company Presentation
Developers of the Software Health Application

The Lab Sends It,

We Trend It,

The User Mends It!

DigiMed Company History

˝ DigiMed was formed in 2010

˝ DigiMed's goal is to develop and provide Health related Software Applications for individuals, physicians and health care facilities

˝ Extensive experience in Government Satellite design and diagnostic testing drove the development of the MediTrends Software Application

˝ Co-founders, Michael Reilley and Frank Bal have over 60 combined years in the Government Satellite business

˝ The MediTrends Software Application was released September 2012

What is MediTrends

˝ MediTrends uses the basic approach of Satellite testing to establish a õState of Healthö (SOH) and applies that to individuals

˝ MediTrends stores critical health parameters such as blood and urine test results as well as lifestyle factors (i.e., exercise, dietary habits, blood pressure, etc.)

˝ MediTrends then tracks and correlates these factors utilizing Patented algorithms that display a color coded õTrend Lineö. These Trend Line(s) provide a warning to an individual long before an adverse medical condition occurs

˝ MediTrends also stores an individual and their childrenøs pertinent Personal Information, Physicians, Hospitals, Pharmacy(s), Medications, Insurance, Medical Issues, Recent Tests, Allergies, Immunizations, Reminders and more!

˝ The individual is then encouraged to work proactively with their physician to develop a get well plan

MediTrends and Lab Testing

˝ Physicians should encourage patients to increase their Lab testing to avoid health issues before they become adverse and address patientsøhealth in a more proactive fashion

˝ MediTrends promotes regularly scheduled Lab Testing to improve the statistical base for trending an individualøs overall health

˝ We are currently working with the Testing Labs to directly download test results

˝ Insurance Companies, Medicare and Medicaid approve of frequent Lab testing, which lowers their patientsørisks and costs

˝ Future releases of MediTrends will target additional mobile platforms, Desktop Computers and Physician/Health Facilities

What makes MediTrends Unique

˝ MediTrends correlates multiple health factors, which produce a snapshot of Early Detection signals that can be used to reduce health issues

˝ The patented algorithms provide a color coded trending line that establishes whether a certain health factor is positive, trending positive, trending negative or negative

˝ These trending charts incorporate õbanded thresholdsö that are lower or higher respectively than the upper and lower limits of the test result, which effectively displays a Warning or All-Clear indication of a userø health (See next chart for Sample)

˝ Utilizes HIMSS Guidelines (Healthcare Information and Management Systems Society)

˝ Currently meets 10 of 25 EHR (Electronic Health Record) Requirements which is Compliant with the Initial Phase of the HITECH Act (Health Information Technology for Economic and Clinical Health)

A Wealth of Health at Your Fingertips

˝ **MediTrends Contains You and Your Children's**:

- . Personal and Lifestyle Information

- . Doctors

- . Insurance Companies

- . Medication(s) and Pharmacies

- . Allergies and Immunizations

- . Medical Issues and Tests

- . Reminders

˝ **Emergency Information Screen**

˝ **And More……**

Our Goal

˝ This is a Win-Win for all
- Identify health concerns Before they occur
- Centralize You and Your Children's health information
- Overworked Physicians get to work more efficiently with their newly empowered patients
- Insurance costs will go down
- EHR is spread more rapidly
- The overall health of our nation is improved

˝ We Have Spent The First Half of Our Career Securing The Nation's Safety Through The Use of Government Satellites, **Now It Is Time To Turn Our Attention To The Health of Our Nation and the World!**

Let's Walk Through *MediTrends*
