

## *A cost effective solution to quickly build, deploy, and bring voice applications to market.*

Create custom voice applications for any market, without writing a single line of code! Nimblevox's hosted IVR, drag and drop service creation environment, and pay as you go pricing makes it simple. Partnered with LumenVox's award winning TTS (Text to Speech), ASR (Automatic Speech Recognition), and CPA (Call Progress Analysis) with AMD (Answering Machine Detection) technologies, Nimblevox provides the most natural and reliable speech technology in the industry. Nimblevox takes care of all the telephony management and provisioning, letting your customers focus on the application innovation that runs their business.

### *Nimblevox*

Build your own IVR applications with our easy to use Service Creation Tool.

- Call Routing
- Voice Broadcasting
- Outbound Calling Campaign Manager
- Surveys, Auto Attendants, Opt-in Marketing Campaigns

### *Nimblevox Engine*

The same engine used for the Nimblevox cloud site can be installed on premise. The Nimblevox engine is available for immediate download, or as an appliance solution.

- VXML/CCXML/SIP Support
- Nimblevox Service Creation Environment
- 200 – 1,200 channels / platform
- Tightly integrated with Lumenvox ASR, TTS, and CPA

### *Service Creation Tool*

- Use our drag & drop service creation tool to quickly and easily create applications for a faster time to market.
- Define and modify call flows without programming using a simple graphical user interface.
- All VoiceXML and CCXML code is built into the nodes for you!
- Reduces application development time, allowing applications to be created, modified, and deployed quickly in order to keep pace with a growing and demanding market-place.
