FOR IMMEDIATE RELEASE

## FIRST-EVER, POWER TOOL MAINTENANCE APP AVAILABLE

### Step-by-step tune-up instructions for DIYers & woodworkers

**MEDINA, MN (February 13, 2013)** — *Woodworker's Journal* has just introduced a new iPad app for power tool users that provides step-by-step maintenance instructions for popular power tools such as the table saw, band saw, jointer, drill press, planer, sawdust collection system, air compressor/nailer and moisture meter. The *Woodworker's Journal* Power Tool Tune-Up iPad App provides DIYers and woodworkers with easy-to-use and yet very specific instructions on how to care for their most precious possessions and keep them running great. The [Woodworker's Journal Power Tool Tune-Up App](#) is compatible with iPad iOS 4.2 or later and is available in the iTunes store as a \$4.99 download.

"This app is entertaining, informative and eminently practical for all power tool users," says Rob Johnstone, Editor in Chief at *Woodworker's Journal*. Johnstone continues, "There's been a real need for this type of information to be easily and readily available and this app now places that information at users' fingertips."

The app has a table of contents where all users need to do is tap on the image of the tool that they want to tune-up to go to that page. Step-by-step instructions, over 150 photos, and over 60 minutes of video are provided by award-winning tool experts Sandor Nagyszlanacy (author of *The Art of Fine Tools* and *Setting Up Shop*) and Chris Marshall (author of *Woodworking Tools & Techniques* and *The Complete Guide to Home Carpentry*). A maintenance calendar included as part of the app keeps power tool users on track with scheduling their own power tool care and tune-ups.

To order The *Woodworker's Journal* Power Tool Tune-Up App, visit <https://itunes.apple.com/us/app/power-tool-tune-up/id566839497?mt=8>)

### ABOUT WOODWORKER'S JOURNAL

*Woodworker's Journal* has chronicled the development of new woodworking tools, techniques and materials for over 35 years. As a leading content provider in print media and a pioneer content provider in digital media, *Woodworker's Journal* incorporates these innovations into the projects it designs to inform, inspire and motivate its audience to continue developing their skills. Writers and editors are active woodworkers who have their fingers on the pulse of the woodworking industry. *Woodworker's Journal* is widely considered to be America's leading woodworking authority.
