

Striking Face
All hammers feature a precision-ground head with a $\leq 5^\circ$ radius to ensure accurate and effective metal movement.

General-Purpose Pick Hammers
Medium-size point and reach for general work.
#14312 Fiberglass
#14313 Wood

Anvil Dolly
Anvil-like shape with a flat, offset surface. Useful in confined areas.
#14307

Dome Dolly
Heel dolly mounted on an extended shaft for hard-to-access areas or vice mounting.
#14308

Curved Cross Chisel Hammers
Great for finishing. Cross peen is used for working in sharp corners. Well-balanced curved chisel for work in close quarters.
#14316 Fiberglass
#14317 Wood

Dinging Spoon
Used to ding ridges smooth and level. When held against a "high spot" and struck with a hammer, it spreads the blow over a large area.
#14301

NEW FAIRMOUNT™ HAMMERS AND DOLLIES

Fairmount body hammers and metal-forming dollies are designed for precision metal-shaping as performed by skilled craftsmen for over 100 years. Each piece is crafted from the highest quality raw materials to provide superior contour, balance and exacting head configuration. These highly precise tools are heat-treated and designed to provide the comfort and control to achieve professional results. The hand-ground and polished heads are securely mounted to fiberglass or genuine hickory handles. With a rich heritage of quality and innovation, these Fairmount Hammers & Dollies continue the tradition and will prove to be your most valuable metal forming tools!

Utility Pick Hammers
Blunt point, short reach. Good for low spots in high-crown panels and other work with minimal clearance. Also good for thinner-gauge panels.
#14314 Fiberglass
#14315 Wood

Curved Dolly
Short, slim general-purpose dolly. Used for beads or flanges on fenders. The flat side is great under the curve of the fender.
#14305

Shrinking Dolly
Shaped like a toe dolly, but has one face covered with raised serration for shrinking metal stretched by dents.
#14306

Toe Dolly
Provides easy accessibility to narrow pockets. Often used in shrinking and dinging flat panels.
#14302

Shrinking Hammer
Serrated face for gathering and shrinking metal stretched by dents.
#14309 Fiberglass

Cross Chisel Hammers
Great for finishing. Cross peen is used for working in sharp corners.
#14310 Fiberglass
#14311 Wood

Heel Dolly
Heel-shaped design makes it easy to reach into sharp corners.
#14303

General-Purpose Dolly
Provides comfortable grip during heavy blows.
#14304
