

# Energy Efficient & Eco Solutions (EEES)

[www.eees.hk](http://www.eees.hk)

# Corporate Structure:

- Energy Efficient & Eco Solutions Limited is fully owned by MITTT Limited (a Hong Kong registered company).
- MITTT Limited is privately owned and with four shareholders.
- MITTT Limited operates as a holding company, it also research's and locates the latest “state of the art” technology, negotiates and enters into OEM and or Exclusive distribution agreements for all products it sells.
- MITTT also designs and develops ancillary items for the products it sells.
- Energy Efficient & Eco Solutions Limited (EEES) is the Sales, Marketing and Technical support company that promotes all products sourced and provided by MITTT.

- EEES is a company that enjoys being part of the “go green” & “energy efficient” revolution that promotes the use of carbon reducing products, solutions and technologies
- EEES is a progressive and dynamic company forged from the necessity for the world to “Go Green” and to reduce our “Carbon Footprint”
- EEES is at the forefront of technology for energy efficiency and carbon reduction with easy to apply liquid solutions and wide ranging greening products.
- EEES holds exclusive or OEM rights for a number of products in the “Go Green” market sectors. ( product description later in presentation)
- The core business of Energy Efficient & Eco Solutions lies within the “Energy Efficiency” “Carbon Reduction” & “Go Green” market segments within the worldwide market.

## Mission Statement:

“EEES is a progressive organization focused on providing companies with the right green technologies that make significant progress towards reducing carbon emissions and conserving energy”

# Company strategy:

- EEES It is a legally and financially independent “clean skin” company.
- EEES has a focus on growing and developing this business.
- EEES has been established to promote and sell distribution rights for the products it carries.
- EEES will seek out or establish new business sectors for the products it carries.
- EEES will seek out and negotiate regional distribution agreements with suitably qualified companies/ persons.
- EEES is operated by Product and Distribution specialists.
- A professional board has been established to set and monitor strong future goals.

At this time EEES has the exclusive distributions rights four (4) core products, being;

- THERMO-COAT:- Nanotechnology – Sol-Gel glass insulation solution.
- HYDRO-COAT:- Nanotechnology Hydrophobic and Hydrophilic solutions for use in all areas where water or oil needs to be displaced.
- Modular Garden Technologies:-
- Smart LED Lightings:-
