

# Natare Products, Systems and Services

for swimming pools, water features and aquatic facilities.

Natare Corporation has long been recognized as the world leader in the swimming pool, aquatics and water feature industry. We design, manufacture, and supply high-quality pools, equipment and systems for new construction or renovation of commercial, institutional and public aquatic facilities and water features. Throughout the years, we have developed the most complete selection of specialty equipment and systems available for any aquatic project.

## Natare Pools

In-ground, on-ground and elevated pools for recreation, leisure, competition, training and medical/rehabilitation/ therapeutic uses. Natare pools are available in three different styles; AWS fully customized all-welded systems, SPS structural panel systems, and Natare “unitized” pools. Natare pools are available in a polished stainless steel finish, with NataClad™ PVC laminated stainless steel or with ceramic tile.

## Natare Whirlpool, Hydrotherapy and Spa Pools

Self-contained spas, whirlpools and hydrotherapy pools in one piece or sectional construction. Standard systems and custom designs with a range of sizes, shapes, finishes and peripheral equipment suitable for home spas to sophisticated training and rehabilitation facilities.

## MicroFlo® Perimeter Overflow Systems

Integral perimeter recirculating systems or overflow channel return systems to provide the ultimate pool surround. Available in deck level, semi-recessed or fully recessed configurations in single channel, double channel and positive suction return.

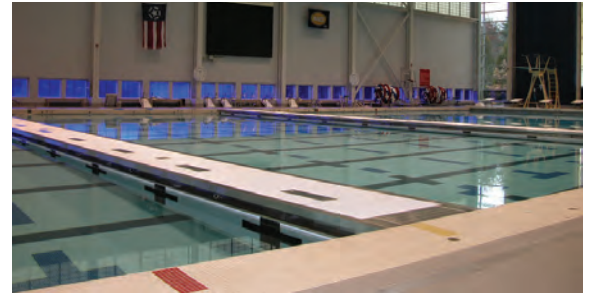

## NataFlo™ Stainless Steel Skimmer Systems and Overflow Weirs

Pre-fabricated, cost-effective surface skimming for smaller public pools, fountains and water features. Cost effective, durable and easy to install.

### Natare® Fixed and Movable Bulkheads

The answer to multipurpose, functional pool systems. Natare bulkheads are worldwide renown for the perfect competition systems. Vertically deployed or laterally moved, Natare bulkheads are available for any pool configuration.

### Natatec® Pool Lining Systems

Simply the most durable, cost-effective and functional pool interior waterproofing system available. Build, renovate or remodel pools *your* way with the freedom to create attractive, functional and watertight pool facilities.

### Natatec® Water Containment Systems and Waterproofing

A range of materials, techniques and processes for when it absolutely *cannot* leak. Whether for pools, water features or any water containment or waterproofing application, Natatec systems hold water in or out.

### NataDek™ & SoftDek™ Recreational & Leisure Surfaces

NataDek-- Comfortable, colorful, slip-resistant and durable PVC surfacing for decks, locker rooms and any wet areas around pools and spas. SoftDek-- the cushioned, impact-absorbing and slip-resistant surface suitable for use in and around the pool areas. Made for those areas where safety requires a shock-absorbing surface. Available as field-installed surfacing or individual safety pads.

### Monotube™ Deck and Site Drainage Systems

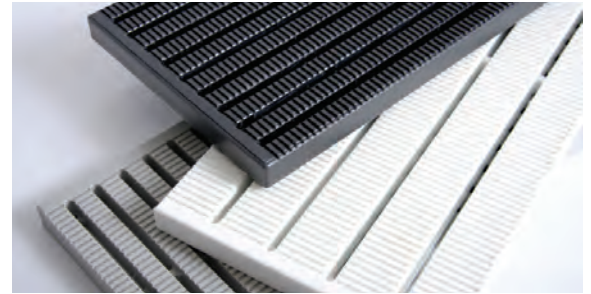

The stainless steel answer to deck drainage and surface water control. Durable, economical and sized for any drainage or water control application, whether the backyard pool or public natatorium.

## Grating Systems

Unique GPM Polymer and PVC profile grating systems for pool surrounds, overflow systems or any pool, spa or recreational environment. The first certified slip-resistant grating with a 10-year full-replacement warranty!

## MicroFlo™ Filtration

High capacity stainless steel vacuum sand and pressure filters in vertical or horizontal configurations, including the exclusive MicroCell™ modular and single tank filters. Offering unique Visual Flow Filtration in sizes suitable for even the largest swimming pools, spas or water features; including Compac™ visual flow vacuum sand filters offering a fully-configured, self-contained filtration plant for the most economical, durable and highest purity filtration available. An entire pool recirculation, filtration and control system ready for fast, easy and economical pool or water feature construction.

## Air Safety Cushion Sparger Systems

Air safety cushions for springboard and platform diving provide instant mounds of highly aerated water in the diver's entry area to help prevent injuries and aid training. Air safety cushion systems can be installed for permanent or removable use, during new construction or for existing pools.

## Underwater Windows and Observation Systems

Natare underwater observation windows are the perfect way to provide a clear view into the swimming or diving pool below the water and are an invaluable aid for underwater photography, teaching and instruction or for the ultimate view of competition. These strong, watertight and shatter-resistant rectangular windows are suitable for installation in any concrete or stainless steel pool or aquatic facility, or in anywhere a clear underwater view is needed.

## MicroFlo™ Stainless Steel Surge and Balance Tanks

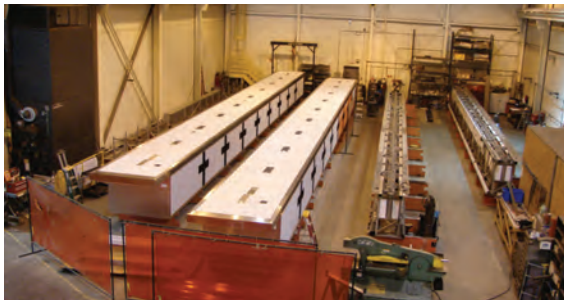

The economical way to provide watertight surge control and pool balancing. Pre-engineered systems, completely plumbed with modulating and control valves. Available as open top visual flow tanks or closed-top systems for below grade use. Suitable for freestanding or buried installation.

## Accessories, Equipment and Systems

Custom fabricated deck equipment, railing systems and starting platforms; products for Virginia Graeme Baker (VGB) pool and spa safety; stainless steel deck anchorage systems and stainless steel embedments; recessed stair sections and package pool step and stair inserts in stainless steel; stainless steel recessed steps, enclosures, deck boxes, drain boxes and frame/grate combinations and pool fittings; deck hatch and access systems; water level control systems; and integrated swimming pool and spa control systems.

## Custom Stainless Steel Fabrication

Natare provides precision stainless steel, plastic and polymer fabrication to turn the most complicated or exotic designs into reality. Complete CAD design and CAM production systems with shearing, forming, punching, machining, CNC routing and welding capabilities for large or small stainless steel specialty metals and polymers.

## Engineering, Technical and Architectural

Services for swimming pool, aquatics or water feature design, construction and renovation.

*Natare equipment and systems are available through a worldwide network of builders, distributors and specialty contractors who are there to help carefully select and conscientiously install our products, equipment and systems to make your facility work for you. Whether it is new construction, renovation or operation, talk to Natare.*
