

splitsecnd is a plug-in crash detection system that significantly reduces the time it takes for life-saving care to reach accident victims. Plug it in and you're done. No cell phone or professional installation required.

Help is on the way

Using built-in location software, **splitsecnd** works with local 911 dispatchers to send emergency aid as needed, arriving within minutes.

Immediate response

In the event of an accident, the **splitsecnd** emergency specialist contacts you to assess the nature of the accident.

You make the call

In situations where there is no impact -- such as a medical emergency -- you can hit the button yourself to be instantly connected.

Setup in a snap

Plug **splitsecnd** into your dashboard. Done. **splitsecnd** works in every car with a cigarette lighter.

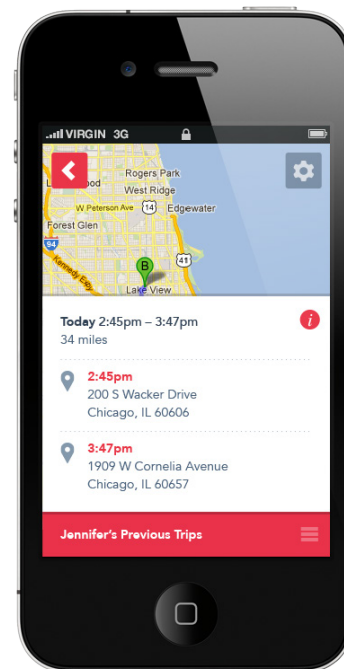

Pricing

Device: \$199.95

Service: \$14.95/month

Eyes on the road

With Family Finder you can monitor the location of your loved ones in real time so you can be sure they arrived safely.

Indicators

The light on the **splitsecnd** button has four modes:

- Off: no power/not functioning
- White: functioning with family finder off
- Blinking White: functioning with family finder on
- Blinking Red: emergency detected and calling **splitsecnd** response

Family Finder

The family finder service allows you to view the last 10 trips made with **splitsecnd** and highlights the start and stop points of those trips. The device identifies a trip as the time between when the car is turned on and off. Family finder can be viewed through your my>**splitsecnd** page on the web or on your phone using the **splitsecnd** app for Android or iOS devices. Family finder can easily be turned on and off by logging into your my>**splitsecnd** page.

Coverage Map

splitsecnd operates on the RACO Wireless network to maximize cellular coverage in the US. While **splitsecnd** can't cover all locations, its cellular coverage does cover 96% of the US population. More details about **splitsecnd**'s wireless coverage can be found at racowireless.com.

Specifications

Weight: 3.04 ounces
Battery Life: 1 hour (talking time)
The battery powers **splitsecnd** if a car loses power in an accident.
Power from USB port: 500mA at 5V
The USB will charge all phones that support charging with a USB cord.
