FOR IMMEDIATE RELEASE

LAUREN CONCISE RECEIVES CONTRACT FOR EPC PROJECT IN GRANDE PRAIRIE

CALGARY, ALBERTA, FEBRUARY 26, 2013 - Lauren Concise recently received a contract from Seven Generations Energy Ltd. to perform lump sum turnkey EPC services for the expansion of a gas plant and a compressor station in the Grande Prairie region of Alberta.

The scope of work for the gas plant includes increasing capacity through the addition of a new process train, increasing LPG storage, increasing condensate/water storage, additional stabilizer capacity and modifications to the existing train.

The scope of work for the compressor station includes increasing capacity through the addition of a third train which consists of separation, compression and dehydration.

Construction mobilization is underway and both projects are scheduled to be completed by the end of May 2013. Seven Generations CEO, Pat Carlson, said, "This project provides critical infrastructure much needed in the area. It will be used to gather and process gas from our own lands and enable us to provide midstream services to our neighbors. The award to Lauren Concise is a reflection of confidence derived from experience through our historical relationship."

About Lauren Concise:

Lauren Concise is a full service EPC contractor serving the Oil and Gas, Power Generation and Mining sectors in Canada. Supported by our parent, Lauren Engineers & Constructors, Lauren Concise offers a unique blend of services, including turnkey Engineering, Procurement and Construction.
