

Global Chemical Logistics 2012

Description: The chemical industry is one of the foundations of the modern economy

Its products are used in almost every aspect of manufacturing and retailing.

Like the rest of the world's economy, the chemical industry has experienced intense volatility over the past few years. However, this has been accompanied by substantial secular change, which has in turn had an enormous effect on the logistics structures supporting the sector.

The growth of chemical production in China is probably the largest of these developments; however the expansion of production in the Middle East is also of significant importance.

These trends have led to the chemical logistics sector becoming a more inter-continental and global market.

Market trends, developments, size and forecasts

Global Chemical Logistics 2012 will give you an allround understanding of the global chemical sector. It provides an in-depth analysis of the trends impacting the market and looks at how these in turn will affect supply chains.

The report includes profiles of the largest chemical manufacturers and distributors, examining how they organise their supply chains and their relationship with their logistics service providers. Companies profiled include: Brenntag, Dow, SABIC, Nexeo, Ineos, Univar, Bayer and BASF.

The report provides logistics market sizing estimates by region as well as five year forecasts, allowing you to identify which regions have the best growth prospects.

It examines the significant trends which are affecting investment in the industry and the performance of the companies which have developed the most successful operations.
