

## Cloud Computing Solutions

Cloud Computing solutions allow you to outsource your entire IT operation, easily adapt to growth or contraction, reduce your capital expenditures, and respond quickly to new market conditions. With more than 150 market-leading standard applications and traditional system maintenance activities via the Cloud, Cetrom offers custom solutions to meet the needs of any size company, in any industry.

- ☀ *Application Library* – Cetrom offers more than 150 diverse Software as a Service (SaaS) applications including customer relationship management (CRM), accounting, Microsoft® Office, email, graphic design and more.
- ☀ *Virtualization Services* - If you can't find your software vendor on our list of applications, or if you have custom programming, Cetrom will work with you to virtualize these applications so they are accessible via the Cloud.
- ☀ *Mobile Workforce Support* - Cetrom provides full access to all technology resources through the Cloud – anytime, anywhere, anyhow. Whether using a Smartphone or tablet, desktop or laptop, your employees can access all their information from any device or operating system.

### Technology Expertise

Our knowledgeable engineers have the deep industry and technology expertise necessary to keep your business running. They work with you during every step, from customizing your Cloud solution through implementation, and will always be available as long as you are working with Cetrom.

### Enterprise-class Security

Rest easy knowing that the market's most robust physical and electronic security tools are always working for you – including enterprise-managed firewall and intrusion detection, automatic inbound/outbound email virus-checking, and the same redundant, SAS 70-compliant data centers used by many Fortune 100 and 500 companies.

### Cost Savings

Transform capital expenditures into managed expenses. From day one, you'll save thousands in software licenses, anti-virus software, setup, backups, upgrades, hardware and maintenance. Plus, with our 'utility' pricing model, you only pay for the resources you need.

### Hybrid Cloud Model

Not ready for a complete move to the Cloud? Cetrom enables your company to take advantage of all the benefits of the Cloud while still realizing the comfort level of having all your data stored on a local server. Whether you want to work from your own servers and replicate back to our Cloud in real-time, or work remotely from our Cloud and replicate back to your own server, our hybrid Cloud model will meet the needs of your business.

**Access *anytime, anywhere, anyhow* with Cetrom Cloud Computing.**
