

a whole new way of Creating & Sharing

FOR EDUCATION: BUNCEE YOUR HOLIDAYS!

a great opportunity to introduce buncee to your classroom

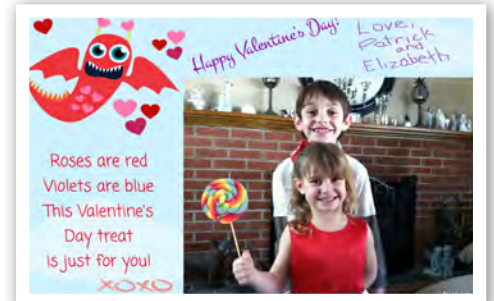

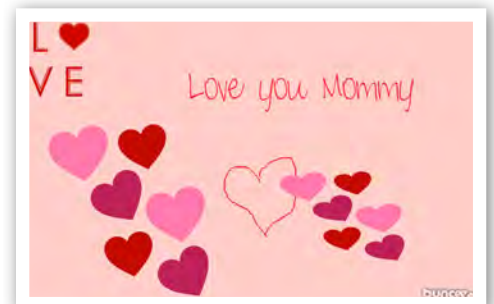

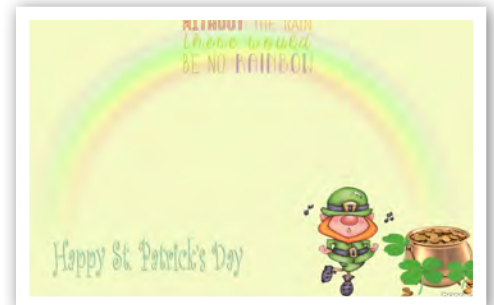

Holiday Projects for your Class!

buncee's easy to use online or mobile canvas makes it fun for classmates to 'go green' by pledging to create digital greeting cards anytime of the year. Anyone can create a basic account on buncee.com for free!

Project Ideas:

- ✓ The flexibility of buncee.com's digital canvas allows kids to choose from buncee's extensive gallery of backgrounds, messages and stickers specially created for the occasion and also incorporate their own personal text, drawings, photos, and online content including songs, youtube videos and more.
- ✓ "buncee bits" (buncee's free iPhone and iPad app) is also a fun, easy way for kids to get in on the fun by sending unique mobile holiday messages and e-cards.
- ✓ For kids (and kids at heart) that enjoy traditional paper cards, classmates can create personalized bunces using the buncee digital canvas and creation tools, and then click the pdf option to print out their buncee!
- ✓ Teachers can get into the spirit and make personalized holiday greeting e-cards that can be tailored to reflect something about each student's achievements or unique attributes.
- ✓ bunces can be used to create special presentations or creative projects with holiday and educational themes.
- ✓ Kids will enjoy making custom digital party invitations that allow their friends to RSVP!
