

# ServeRx™

## Hardware

One component that completes the closed loop ServeRx™ Pharmacy Management System is the hardware designed to meet your medication dispensing needs. The ServeRx™ System offers a number of hardware options including medication cabinets, bedside solutions and supply cabinets. Each unit is a building block towards the best medication administration solution for your facility.

# ServerRx™

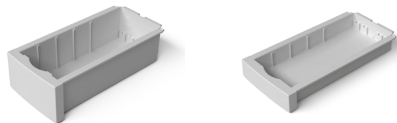

## Medication Cabinets

ServerRx™ Medication Cabinets offer a wide variety of storage capabilities which are controlled by advanced software to create a cost effective medication management solution.

- Patient specific drawers
- Large, standard and high capacity drawers
- Increase reliability, ergonomics and functionality
- Secure storage module with adjustable shelving capabilities

Drawer Configurations

## Supply Cabinets

Never before has it been more cost effective to add a supply solution. The ServerRx™ Supply Management solution provides both material management control and automated access controlled storage in a single end-to-end system.

- Modular shelving layout
- Accommodates trays and baskets

## Bedside Solutions

The 3AM bedside solution uses the SmartCart to provide automated medication dispensing and assurance of the Five Rights of Medication Administration at the patient's bedside. The SmartCart is a key element in providing the ServerRx™ closed loop solution while supporting:

- Open architecture for supporting multiple eMAR platforms
- Multiple size and number of drawer configurations
- Advanced ergonomics
- Wireless (WiFi & Bluetooth)
- Barcode reader
- Biometric reader for user identification

## Hosted/Refrigerated

The hosted unit is suitable for limited numbers of items or for use in areas with limited space. with the capability to have secure drawers working inside a refrigerated environment. Modular design with 1, 2 or 3 module options for standard or large drawer configurations.

- Proximity sensor for hosted/fridge use (drawers only open once the fridge door is open)
- Suitable for controlled drugs.
- Temperature and humidity monitoring and alert.
- Emergency opening (double keys).
- Refrigerator supplied separately.
