

CNC FABRICATORS, LLC
OUR STORY

WHAT WE DO

We design and build items that:

- Stand out
- Delight our customers
- Are built to last
- Sell

WHY WE DO IT

“Sometimes customers want something to remember, something that is their idea, has their name on it, something that is uniquely theirs and something that will still be around long after they’re gone. That’s what we’re all about. Those are the types of things we build.”

Casey Perritt, Founder, Artist & Designer
20 years experience in computer aided
design, MIG and TIG welding, and steel
fabrication.

HOW WE DO IT

“It first starts with a good product idea. Then we use a computer-aided design package to make sure the idea will convert well to metal or wood. Then we let the plasma cutter do its thing. Then we refine it, polish it, and paint it until it’s good enough to put our name on it.”
