

PRESS RELEASE

Valdata Systems Announces New Version of Recipe Manager with Enhanced Costing Calculations and Cloud Version

The new release of Recipe Manager Pro 2013 helps users simplify the formulation process while improving costing, batch record generation and traceability.

March 18, 2013: Valdata Systems today announced the release of Recipe Manager Pro 2013. This release provides significant enhancements to the popular Recipe Manager formulation software package including:

- Streamlined installation process
- Easily track packaging options
- Improved costing calculations
- Multiple standard batch sheets to choose from
- Cloud/Hosted version available

The new release of Recipe Manager Pro builds on the existing features which have made the software a leader in formulation and recipe development including:

- Include full process specifications with each recipe
- Eliminate of errors commonly found in manually generated recipes
- Batch Sheets generated based on order information
- Track actual results of batches, including quantities consumed and yield produced
- Track raw material lot usage in manufactured product
- Calculate finished product costs based on ingredient definitions
- Easily track multiple packaging options for each product, complete with costing for each packaging option
- Scale-up orders to any weight or volume required
- Create Batching Orders and attractive printed Batch Sheets
- LIMS functionality; Track samples and test results for raw materials and manufactured products
- Standard Quickbooks interface
