

LED Strip to LED Channel Compatibility

Rules:

- no If strip is wider than the inside width of the channel, the strip doesn't fit.
- good Fits, if the channel width is 100-150% of the strip width.
- loose Rather loose, if the channel width is more than 150% of the strip width.
- too hot Maximum 10 watts/meter for MDF (wood fiber) channel. Might get a bit hot if you exceed that.

	Inside Channel Width (mm)	Max. Strip Width (mm)	Non-Waterproof Flexible Strip						Rigid Strip Part #: RGB strip	Superflat Rope	
			Strip Width (mm)						monochrome sf5050-60-xx	RGB sf5050-60-RGB
