## POWERFUL ESI COLLECTION SOFTWARE

### IDENTIFY AND COLLECT

Law firms and Corporate Legal Departments now have a very cost effective solution to reduce their ESI collections to a more relevant and manageable size. Thus, saving themselves and their clients thousands of dollars per legal hold/law suit.

Whether you are doing remote collections across the network collecting 100's of custodians or you are filtering your collection down by keyword searching you can see why Harvester is being used by government agencies, law firms, and Fortune 500 companies across the world.

Pinpoint Labs Harvester software has now gone from a collection/preservation tool to a multi-purpose filtering/culling tool that can be used at the point of collection or for in-house processing.
