Plug-and-Play RFID and Video Surveillance Kit

The Nox RFID Sting Kit comes with everything you need for a surveillance operation. The Nox-2 label-style RFID tags can be covertly mounted on items you wish to track and the HD camera can be mounted overtly or covertly to record video of any event. The starter kit is pre-configured and optimized to run on an included Notebook PC for fast out-of-box deployment. A one-page plug-and-track startup instruction sheet gives you simple instructions to be operational in 2 minutes and 90-days of premium support is included for unlimited help to determine the best way to implement your operation. All components are premium interchangeable parts of our full NoxCORE surveillance kit.
