Silicon Valley  
Toronto

Our collaborative environments provide you with access to innovative technologies and world-class expertise, enabling you to envision, design, and deploy solutions to meet your exact needs.

## Outstanding Environment

Our facilities include a spectrum of purpose-built environments to ensure world-class learning and development experiences.

## Technology Experts

The staff will work side by side with your team to rapidly find solutions to your technology challenges. Our staff's expertise and in-depth knowledge of Microsoft products and technologies ensure that you benefit from development best practices.

## Industry Leaders

We have formed alliances with industry leaders to provide comprehensive resources, including hardware, software, and services, for the duration of your team's engagement.

Our dynamic collection of resources shortens your time to market by removing traditional barriers and reduces the total cost of solution acquisition. Drawing on the integrated innovation of Microsoft products and technologies, the MTC can be a powerful resource for your organization.

Our Technology Centers marshal their premier resources into unique offerings, each of which focuses on a different aspect of your organization's search for a solution.

### Strategy Briefing

This one-day briefing starts by examining your current IT environment and business objectives. Then it moves into an envisioning session, where you'll see Microsoft solutions in action through powerful demos and scenarios customized to meet your needs. The day includes mutual discovery, tailored product and technology drill-downs, and expert presentations. It culminates with the delivery of a clear and actionable picture of how Microsoft and partner technologies can help you reach your business goals.

### Architecture Design Session

This custom session focuses on your business objectives and aligns them with specific applications of Microsoft software to help you not only meet your goals, but also capitalize on them. We'll provide architectural guidance, consultation on preferred practices, and risk analysis to chief technology officers, architects, and senior members of your development team.

### Proof-of-Concept Workshop

Our architects work closely with key members of your technical staff to transfer knowledge and prove out customized solutions during the course of this in-depth workshop. This workshop may also include detailed demos and training sessions. Your team will have a private, secure, and fully loaded development suite that's preconfigured prior to their arrival.

### Interactive Experience

Spend an hour or an afternoon interacting with a wide variety of Windows Phones and slates, Surface and Xbox Kinect as part of a facilitated demonstration and discussion around the consumerization of IT and what that means in your organization.

### Hands-on Immersion

If seeing is believing, then imagine what a hands-on immersive experience can do! Attend a custom briefing that includes a facilitated, hands-on environment where you and your colleagues can experience the vision of Microsoft's platform and solutions firsthand.
