Refresh Aesthetic & Lifestyle Medicine

Press Release

Dr. Larry P. Vigilia, MD

The New Secret of Youthful Rejuvenation Comes to Refresh Aesthetic & Lifestyle Medicine in Glendale, California via the Vampire Facelift®.

The new non-surgical and non-invasive Vampire Facelift® procedure offers stunning results using Platelet Rich Plasma therapy and proprietary techniques.

Glendale, California:

Refresh Aesthetic and Lifestyle Medicine in Glendale, California, is introducing the Vampire Facelift® procedure for residents throughout Southern California. The Glendale offices, headed by Dr. Larry P. Vigilia MD., are quite enthusiastic about the results of their new non-invasive medical technique that helps reverse the appearance of aging skin, acne scars and collagen depletion. During a discussion with his team, Dr. Vigilia stated, "Our body's blood is the best source of healing and regenerative properties. We now have the technology to isolate the growth factors introduced into the dermis. Growth factors attract and cause proliferation of stem cells and the stem cells of a person's own blood help stimulate youthful skin regeneration." Dr. Vigilia added, "The new Vampire Facelift procedure assists with reversing normal aging effects, particularly on the areas of the face, neck, chest and hands, as well as hair growth. And because one's own blood is the source of the therapy, there is virtually no risk of allergic complications or intolerance."

According to Dr. Vigilia, the Vampire Facelift® procedure utilizes Platelet Rich Plasma therapy (PRP) in conjunction with recently proven methods to aid in the reversal of aged skin tissue deterioration that manifests as wrinkles, facial folds and the "hollowing" around eye sockets. Dr. Vigilia adds, "PRP has been used in recent years to expedite the healing process of many surgical procedures, as well as to improve recovery from sports injuries. We can now incorporate PRP with added techniques to stimulate the regeneration of skin cells, collagen restoration and the skin's underlying tissue with remarkable results."

Dr. Vigilia believes in holistic approaches to maintaining health and restoring a youthful appearance wherever possible. "The body has its own healing processes, but they do deteriorate with age and sun exposure. Offering the Vampire Facelift procedure aligns with my beliefs for an extremely cost-effective and non-invasive method to help restore one's youthful and natural aesthetic beauty."

Refresh Aesthetic and Lifestyle Medicine is a professional medical group based in Glendale, California since 1983.
