

The mission at Evolve Exchange is to provide companies our comprehensive suite of services empowering businesses to the next level of certification and beyond.

Evolve Exchange will provide you with the tools and services needed to achieve **Meaningful Use Stage 2** Certification using our secure medical cloud based infrastructure.

By joining Evolve Exchange, you will have access to valuable resources needed to succeed in a crowded marketplace while growing your business to new heights.

Are You Meaningful Use Stage 2 Certified?

Evolve Exchange provides companies with the benefit of interoperability utilizing our secure cloud based infrastructure to achieve the “transitions of care” requirement and Meaningful Use Stage 2 Certification.

Evolve Exchange enables companies to access and utilize our secure medical cloud technology infrastructure (IaaS) to achieve interoperability. By aligning with our technologically advanced cloud platform, Evolve Exchange provides companies with a distinct competitive advantage, enhancing your sustainability in the marketplace.

We have developed an Exchange Network that enables you to access and utilize our secure **medical cloud technology infrastructure** (IaaS) to achieve interoperability.

The greatest benefit of joining Evolve Exchange is interoperability, which provides the ability to Connect, Share, and Evolve using our secure medical cloud based solution. Evolve Exchange permits communication with HIE's and all third party medical facilities to achieve the “transitions of care” requirement necessary for Meaningful Use Stage 2 Certification. This suite of services offers seamless integration to insure maximum functionality with our state of the art medical cloud infrastructure.

EVOLVE EXCHANGE MEDICAL CLOUD SOLUTION:

\$10,000 one time fee plus \$75 a month per provider.

Client will be charged a \$5000 annual maintenance fee commencing the second year.

Our secure medical cloud platform infrastructure streamlines interoperability and data exchange for EMR companies in order to achieve Meaningful Use Stage 2 and future certifications. Evolve Exchange empowers companies with medical cloud based technology that will assist them in overcoming obstacles such as Transitions of Care and PQRS, allowing your company and your clients to prosper. Realizing this vision, we have developed one of the most powerful, secure medical cloud platforms on the market.

Leveraging our industry leading features, including cutting edge net scaling and Linux cluster technology, we have created a highly scalable, extremely powerful medical cloud based infrastructure.

Extra functionalities are provided by preferred integration partners and are available for an additional cost.

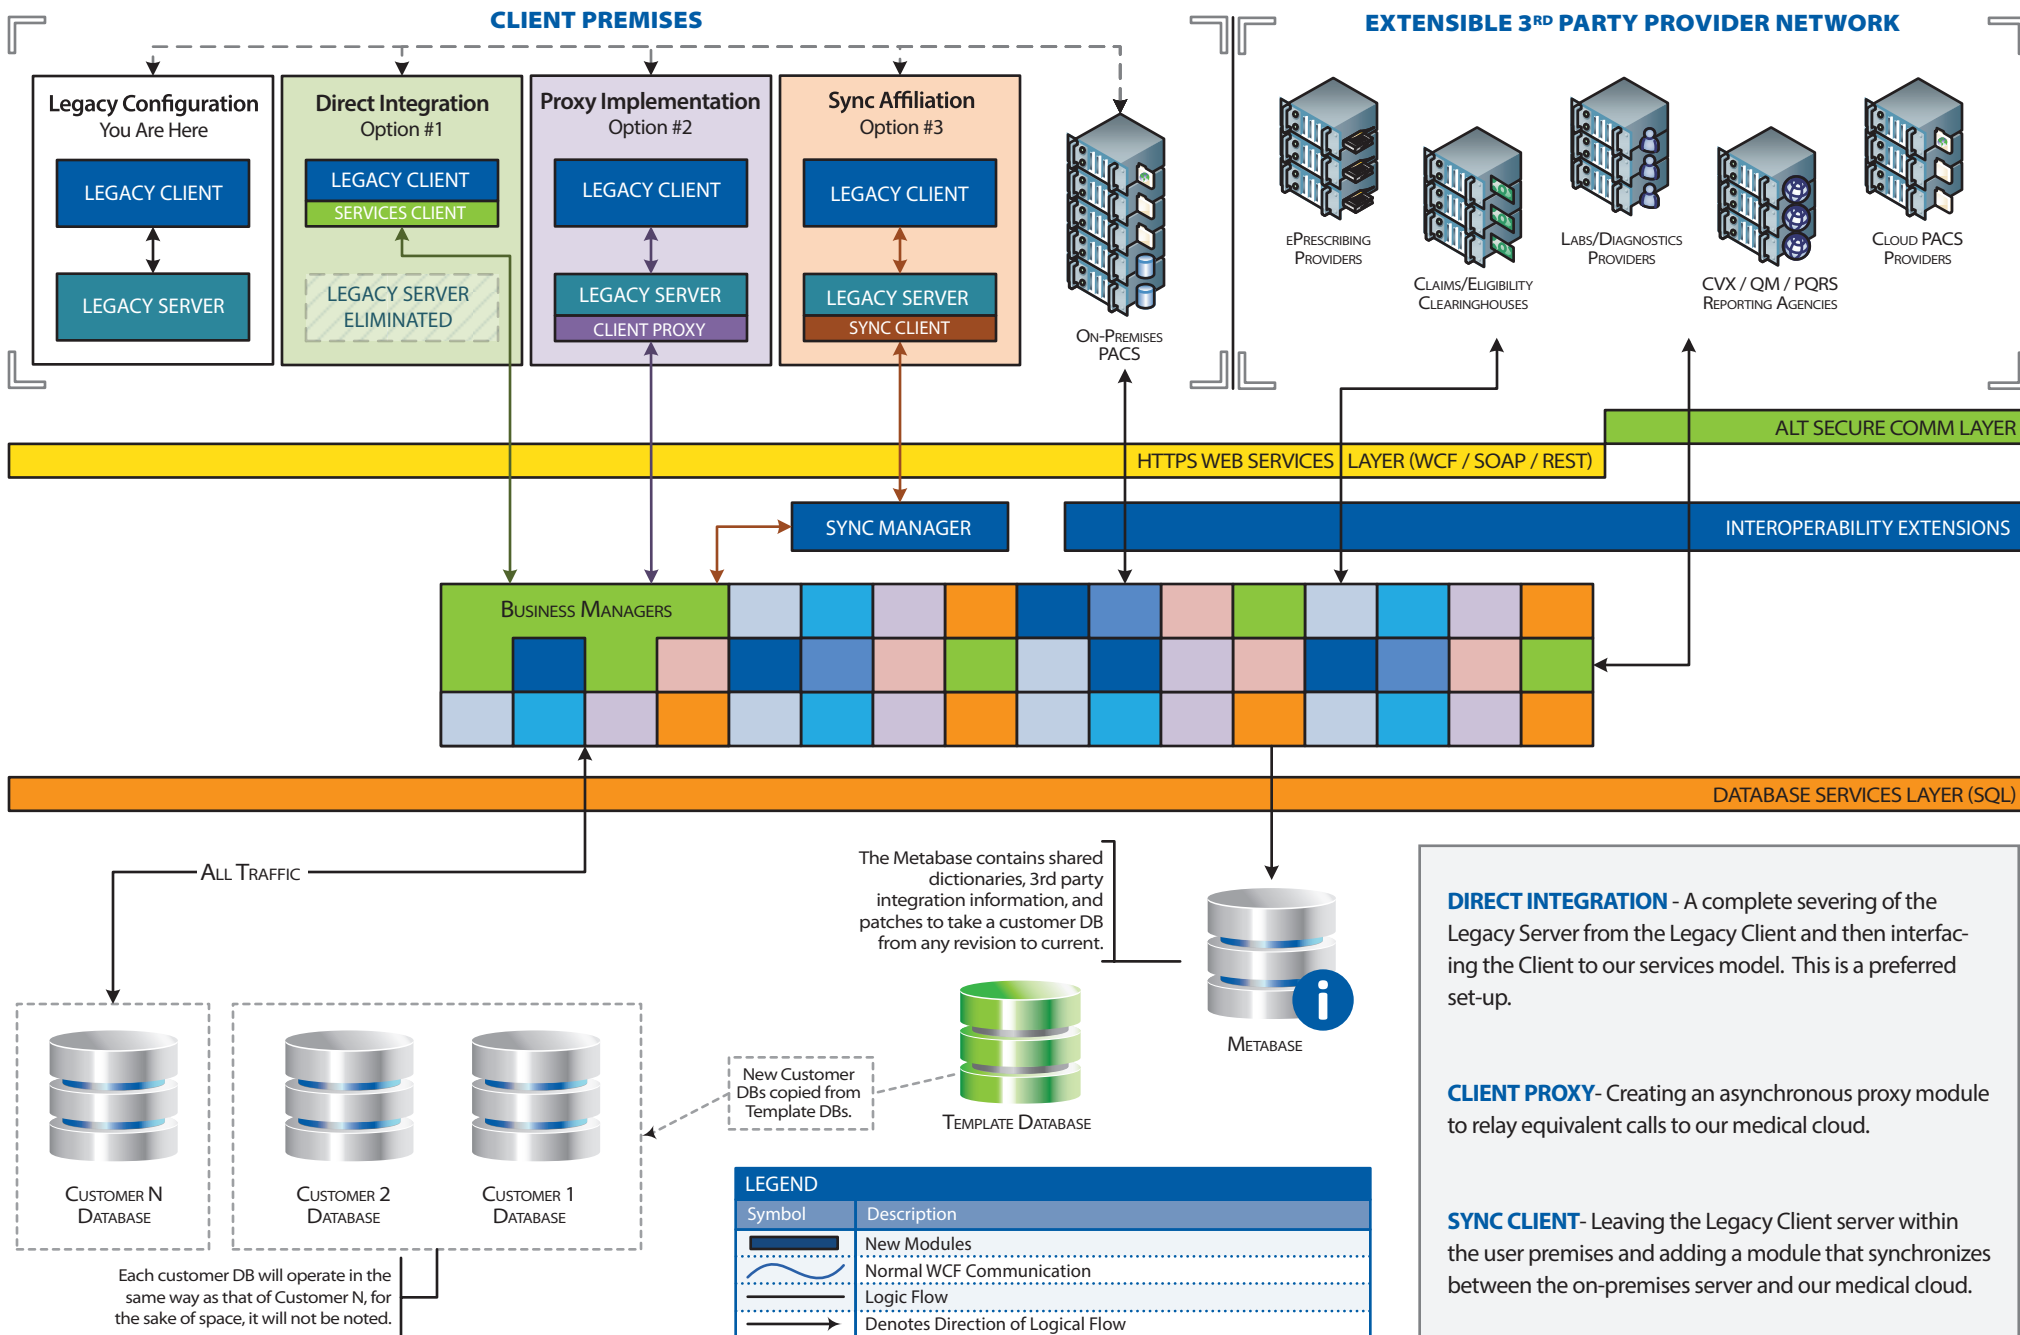

All stated costs are per eligible provider:

- Clearinghouse -\$95 Per Month
- Streaming Labs - \$20 Per Month
- PQRS Functionality with submission - \$45 Per Month. Additional non-provider user accounts are \$20.
- Dragon Voice Command Navigation—Varies depending on quantity of licensed users. Please call for details.
- E-Prescribe- \$400 Per Year
- Apple and Android Functionality - \$95 Per Month

Evolve Exchange - Health Care Services Platform

Client Implementation | Services Overview | High Level Logic

DIRECT INTEGRATION - A complete severing of the Legacy Server from the Legacy Client and then interfacing the Client to our services model. This is a preferred set-up.

CLIENT PROXY - Creating an asynchronous proxy module to relay equivalent calls to our medical cloud.

SYNC CLIENT - Leaving the Legacy Client server within the user premises and adding a module that synchronizes between the on-premises server and our medical cloud.
