> 3,451 Lumen LED LiteBox[®] Rebuild

Excellent visibility on an emergency scene is imperative. Imagine if you could increase the output of your aging or broken traditional Streamlite LiteBoxes or FireBoxes by 32 times; couple that with an optic pattern designed to act as a spotlight and floodlight at the same time and an industry leading lifetime warranty on the light head.

Introducing the HiViz *Supercharged* Handheld Scene light. This program is a full rebuild and repower for aging LiteBoxes. Ship HiViz your cosmetically in-tact LiteBox for remanufacturing and installation of the upgrade kit. Replacement parts include: Circuit Board, Battery, Housing Spacer, Housing Hardware, Switch, Lamp Assembly, and electrical charging connector.

Output is 32 times brighter than the standard 8 watt lamp and 26.5 times brighter than the E-Flood upgrade.

Mounts in any existing LiteBox or FireBox Cradle without modification
