Secure Foundation Systems Announces 15-Year Transferable Sinkhole Stabilization Warranty

(Ocala, Florida) April 11, 2013 – Today, the sinkhole stabilization company, [Secure Foundation Systems](#), announced their “SECURE” 15 Year Transferable Warranty. This warranty raises the bar in the sinkhole stabilization industry by offering homeowners a 15-year warranty on foundation stabilization projects. Another differentiator between Secure Foundation Systems’ warranty and those of competitors is the management of the warranty. Should an issue arise with a property, the owner will not have to call a 3rd party and deal with a call center or a home warranty technician from another company. Customers have the peace of mind knowing they can directly call knowledgeable and familiar Secure Foundation Systems personnel. The warranty is also fully transferable, giving homeowners and potential buyers, peace of mind should a homeowner wish to sell their property in the future.

“We have always been confident in our repairs and know they stand the test of time,” said Ryan Gummer, President of Secure Foundation Systems. “We are proud of our success rate and the fact that we have not experienced a single failure since our inception. Not many companies can say that! Now, our customers can be even more confident they will receive the highest quality service and workmanship, before, during and after a stabilization project.”
