

Key Features

- Increase communication
- Involve parents
- Use real-time data
- Monitor student progress
- Standardize processes
- Secure critical information
- Analyze student data

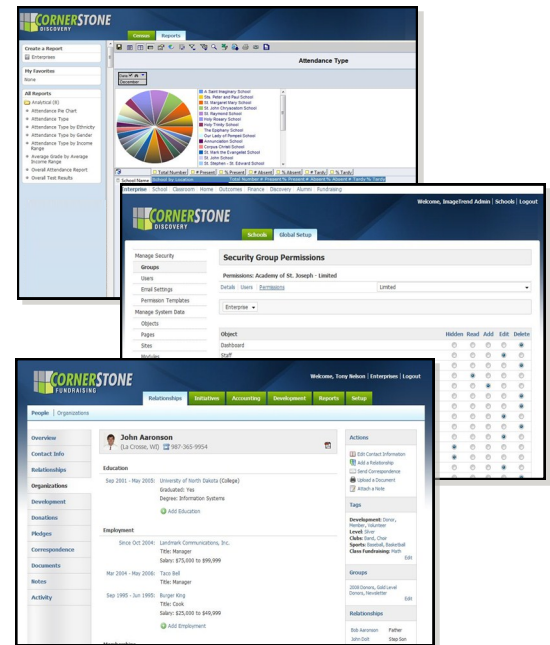

The **Cornerstone** software suite has been designed for the needs of a school district. All of your schools' records can be integrated into one centralized, easy-to-access database. Cornerstone will allow Superintendents and other officials to promote and standardize processes associated with report cards, discipline, attendance, reporting and class size. Superintendents can track attendance, performance, demographics and enrollment numbers for all of their schools.

Strengthening School Communities

Increasing communication between students, parents and faculty is a priority today. Cornerstone provides secure Internet sharing of information and communications to meet that goal. Parental involvement plays a key role in boosting student performance and the success of school districts. Integrated communication tools quickly generate an email or mail merge letter to a class, school or whole district. Tiered permission groups control access to members so they can control the information and tools utilized and viewed.

Streamline Management Activities

Cornerstone is fully Web-based, providing use of data in real-time. It simplifies complex school data into a central database and opens secure access to critical information. This enables superintendents and principals to stay on top of student progress with easy monitoring of schedules, homework, attendance, teacher lesson plans and gradebooks.

Connecting the Home to the School

With Cornerstone, schools can provide parents access to student assignments, assessments, attendance, report cards and teacher comments, as well as news and events. Parents have the ability to subscribe to automatic notification services about their student's performance, activities and progress. Cornerstone provides benefits parents can appreciate while giving the school a technological advantage in the marketplace.

Cafeteria

The Cafeteria module allows schools to maintain meal plans, including subsidized plans, lunch balance, menus and inventory. When used with the Finance module, schools can collect point of sale data and other financial information. The Finance module is an intuitive accounting tool that streamlines the management of tuition and fees, allowing users to quickly generate invoices and statements, as well as view accounts receivable. Managing money online has never been easier.

Cornerstone Classroom

Cornerstone Classroom is designed for the needs of teachers in the classroom. Teachers can view class lists and student information, take lunch and beverage count, manage assignments, track attendance, input grades and more. With this Web-based system, teachers can access their information anywhere, allowing for easy data input from home.

Cornerstone Discovery

Through Cornerstone Discovery, superintendents can create a dimension of reporting not possible with conventional reporting methods. Student data is analyzed and filtered in a bar, pie or line graph, with administrators choosing the specifics of the data and display method. Specific tests can be broken down and evaluated by region, school, grade, gender or age. This information helps superintendents direct their schools toward specific areas of needed improvement. Cornerstone Discovery aids in impacting change, which will affect the overall performance of principals, teachers and students.

About ImageTrend

ImageTrend is an award-winning software development company providing streamlined solutions to a variety of industries, including: government, medical, human resources, business, education and non-profit. We strive to create a better world through technical innovation, a vision of what is possible and our commitment to designing the best web applications and strategies. The company advances this paradigm through our unique philosophy that combines a detailed understanding of our clients' business practices and legendary customer support. Through continuing education, ideation and plans for maximizing growth, we are exploring all available opportunities and, in turn, passing this knowledge and technology to you.
