

Fleet Genius PRO

fleet management application

Prova's Fleet Genius® PRO fleet management application is a web-based fleet management tool that enables simpler management of vehicle fleets and their drivers.

The easy to used web system can be accessed through any browser on a PC, Mac, tablet or smartphone.

The system supports any vehicle in a fleet of any size and works with ³ Prova's VHM line of OBD-2 fleet management monitors to help customers monitor, measure and manage their fleet.

Its features include:

- **Preventive Maintenance programs** to track upcoming and overdue maintenance on fleet vehicles;
- **Utilization management** to track usage, utilization and fuel economy for every trip;
- **Driver behavior management** to assist in managing the safe driving profiles of every driver in the fleet.

Fleet Genius PRO supports:

- Supports any vehicle with or without a VHM.
- Automated meter reading (miles, gallons, operating hours, odometer, fuel used)
- User configurable preventive maintenance schedules and email alerts
- User configurable driver behavior monitors and email alerts
- Full report capability
- And much more

SIMPLE TO USE COLOR CODED DASHBOARD INTERFACE

Fleet Genius PRO is accessed through its simple, color coded fleet DASHBOARD which provides an up-to-the minute analysis of the state of the fleet. The dashboard highlights every vehicle and driver along with a status indicator.

The system also provides overall fleet metrics for viewing trends and metrics for

- fleet fuel economy,
- driver safety issues,
- utilization trends,
- maintenance,
- engine diagnostics.

DETAILED VEHICLE TRIP, UTILIZATION AND MAINTENANCE RECORDS

Fleet Genius Pro vehicle records include details of every vehicles expected operating efficiencies and metrics that compare expected efficiencies against measured performance.

The vehicle detail record includes:

- Vehicle information including VIN and registration info,
- Individual trip tracking
- Preventive maintenance schedules and outstanding maintenance actions,
- System alerts for fuel economy, idle time and more,
- Engine diagnostics and DTC decodes,
- Driver behavior monitoring,
- Fuel economy tracking

Vehicles without VHMs report only maintenance activity and email alerts driven by updated odometer readings.

DETAILED DRIVER TRIP, UTILIZATION AND SAFETY BEHAVIOR RECORDS

Fleet Genius Pro driver records include details of every drivers utilization profile, safe driving record and fuel economy performance.

The vehicle detail record includes:

- Driver information including licenses, insurance coverage and other information,
- Individual trip tracking by date/time/ destination,
- System & email alerts for fuel economy, idle time, speeding, aggressive driving and more,
- Fuel economy tracking by driver

Vehicles without VHMs report only maintenance activity and email alerts driven by updated odometer readings.

FULL SYSTEM, VEHICLE, TRIP AND DRIVER LEVEL REPORTING

Report on the entire range of data collected by Fleet Genius PRO and your vehicle's VHMs.

Reports include fleet level statistics and utilization data but also drill down to reveal complete details of the fleets operations.

Export fleet reports into CSV formatted files for further analysis or upload to other systems.

File away reports in PDF formats to complete monthly, quarterly or annual reporting requirements.

DETAILED TRIP RECORDS

Fleet Genius Pro trip detail records include details of every drivers utilization profile, safe driving record and fuel economy performance.

The vehicle detail record includes:

- Vehicle information,
- Driver information,
- Detailed speed, fuel use, acceleration and deceleration data and histograms,
- System & email alerts for fuel economy, idle time, speeding, aggressive driving and more,
- Fuel economy analysis
- Every trip idle event over I sec is recorded

Vehicles without VHMs report only maintenance activity and email alerts driven by updated odometer readings.
