**bulk wifi or  
common area.**

## *what renters want...*

today's tech savvy renter is totally mobile and always connected. more than any other amenity, apartment residents want fast, reliable, wireless internet and stellar mobile phone service. residents don't want to be restricted to their apartment - they want to be connected everywhere; in their apartment, outside, in gym, by the pool... wherever they are!

## did you know?

### **wifi ranked number one hotel amenity in 2012!**

a 2012 survey by hotels.com ranked free wifi in hotels as the most requested amenity by travelers. in addition, the availability of wifi was a major factor when choosing at which hotel to stay.

## did you know?

### **your residents are marketing for you!**

residents are not the only ones benefiting from your property's wifi network. your wifi network is being used to market your property; via social media, video sharing apps and review sites - residents are taking word of mouth to a whole new level. property-wide wifi allows your residents to promote your property from anywhere!

# the most requested amenity from the leader in managed wifi.

## unlimited, high capacity data

the reality of smartphone and tablet usage is changing the game for building owners. residents are demanding high capacity data like never before. leasing agents and hotel staffs are leveraging the benefits of mobile applications for leasing and improved communications. cellular simply doesn't cut it - today's buildings require the secure, unlimited, high capacity data that only a usersafe® wifi network can offer.

what is usersafe®  
technology?

usersafe® technology offers the most secure wifi experience available today. each user is isolated while using your property's wifi network, allowing for safe surfing, email, banking and shopping. usersafe® guards against hacking and identity theft that can occur over typical wifi networks.

usersafe® technology is ONLY available from spot on networks.

## why choose spot on networks?

not all wifi providers are the same - just like not all properties are the same. spot on networks is unique in the industry. we custom engineer, design and deploy networks that are as unique as your property. our secure, fully managed and monitored networks are solving the most pressing problems facing today's building owners.
